

Health and Wellbeing Outcomes Report

Report of the Chief Officer for Communities, Public Health, Environment and Prosperity

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper introduces the updated outcomes report for the Devon Health and Wellbeing Board, which monitors the priorities identified in the Joint Health and Wellbeing Strategy for Devon 2016-2019.

2. Summary of the Health and Wellbeing Outcomes Report, June 2017

2.1 An 'updates only' version of the Health and Wellbeing Outcomes Report for June 2017 is included separately. The report is themed around the five Joint Health and Wellbeing Strategy 2016-19 priorities, and includes breakdowns by local authority, district, clinical commissioning group, inequalities characteristics and trends over time. Nine indicators have been updated with new data since the March 2017 report:

- **Teenage conception rate, 2015** – The latest rate (18.3 per 1,000 females aged 15 to 17) was broadly in line with South West (17.0), local authority comparator group (18.1) and England (21.0) rates. Rates have fallen significantly over recent years.
- **Alcohol-specific admissions in under 18s, 2015-16** – The rate per 100,000 population in Devon (51.8) is broadly in line with the South West rate (46.8), and significantly above the local authority comparator group (39.3) and England (37.3) rate.
- **Alcohol-related admissions, Q3 2016-17** – Admission rates have fallen on 2014-15 levels and are significantly below the South West and England rates.
- **Male life expectancy gap, 2013 to 2015** – For males in Devon the average gap between the most and least deprived communities is 5.9 years, which is significantly lower than the gaps for the South West (7.7), and England (8.2).
- **Female life expectancy gap, 2013 to 2015** – For females in Devon the average gap between the most and least deprived communities is 3.9 years, which is significantly lower than the gaps for the South West (5.0), and England (6.4).
- **Injuries due to falls, 2015-16** – The age standardised rate per 100,000 was 1788.0 in Devon, which is below the South West (2046.5), local authority comparator group (1954.8) and England (2169.4) rates.
- **Reported domestic violence incidents per 1,000 population, 2014** – Devon has a rate of 12.00 per 1,000, below the South West (19.37), comparator group (19.34) and England (22.07) rates. Within Devon rates are highest in Exeter (15.91).
- **Hospital admissions for self-harm in persons aged 10 to 24, 2015-16** – The admission rate per 100,000 in Devon was 614.1, which is above the South West (597.8), local authority comparator group (507.6) and England (430.5) rates.
- **Gap in employment rate (mental health service users), 2015-16** – The gap in employment rate between mental health service users and the overall employment rate in Devon (73.2%) is wider than the gap for the South West (68.0%), and England (67.2%).

3.2 Further details for these indicators is included in the separate report. The following tables in this paper provide a quick summary of overall findings:

- Table 1 provides a summary of the indicators, the latest available rate, an indication of trend and a quick comparison between Devon, the South West and England.
- Table 2 gives a short textual summary covering the five priority areas.
- Table 3 compares the indicators with Devon's local authority comparator group, a group of similar local authorities, and is ordered according to Devon's ranking. The darker purple shading shows the position of Devon in the local authority comparator (1 is best and 16 is worst) and the lighter purple shading shows Devon's ranking when the report was introduced in December 2016.

Table 4: Priority Area Summaries, June 2017

Priority	Summary
1. Children, Young People & Families	Teenage conception rates are falling and levels of development at school entry are improving. Variations in excess weight, poverty, GCSE attainment and alcohol harm persist.
2. Living Well	Smoking rates and deaths from preventable causes are falling, and levels of excess weight, physically activity and fruit and vegetable consumption compare favourably with similar areas.
3. Good Health and Wellbeing in Older Age	Deaths at home, healthy life expectancy, falls and GP support compare well in Devon. However, whilst the service is effective, the coverage of re-ablement services is lower.
4. Strong and Supportive Communities	Housing-related measures, including fuel poverty, dwelling hazards and rough sleeping levels are a cause of concern in Devon.
5. Life Long Mental Health	Whilst general wellbeing is better, poorer outcomes are evident for those with mental health problems, including suicide rates, self-harm, and the mental wellbeing of local service users.

6. Public Health Impact

The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcomes indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.
