HEALTH AND WELLBEING BOARD

Thursday, 7th April, 2022

A meeting of the Health and Wellbeing Board is to be held on the above date at 2.15pm at Council Chamber, County Hall to consider the following matters.

Phil Norrey
Chief Executive

A G E N D A

PART I - OPEN COMMITTEE

1 Apologies for Absence

2 Minutes (Pages 1 - 8)

Minutes of the meeting held on 13 January 2022, attached.

3 Items Requiring Urgent Attention

Items which in the opinion of the Chair should be considered at the meeting as matters of urgency.

4 COVID-19 Update

Verbal update from the Director of Public Health.

PERFORMANCE AND THEME MONITORING

5 Devon Joint Health and Wellbeing Strategy: Priorities and Outcomes Monitoring (Pages 9 - 10)

Report of the Director of Public Health, which reviews progress against the overarching priorities identified in the Joint Health and Wellbeing Strategy for Devon 2020-2025, attached.

BOARD BUSINESS - MATTERS FOR DECISION

6 Better Care Fund - Update (Pages 11 - 14)

Joint Report of the Interim Director of Integrated Care (Devon County Council and NHS Devon Clinical Commissioning Group), attached.

7 Annual Health Protection Assurance Report 2020/21 (Pages 15 - 40)

Annual Health Protection Assurance Report for the Health and Wellbeing Boards of Devon County Council, Plymouth City Council, Torbay Council and Cornwall and the Isles of Scilly Councils 2020/21, attached.

8 Devon Voluntary, Community and Social Enterprise (VCSE) & Public Sectors: Creative Collaboration in a Pandemic

Representatives from the voluntary sector will attend and give a presentation.

9 Alcohol specific admissions in under 18s & links to deprivation (Pages 41 - 46)

Public Health report, attached.

10 GP Strategy Review for Devon

Presentation by Dr Paul Johnson

11 CCG Update

An update from the Chair of NHS Devon Clinical Commissioning Group, attached.

OTHER MATTERS

12 References from Committees

None

13 Scrutiny Work Programme

In order to prevent duplication, the Board will review the Council's Scrutiny Work Programme.

14 Forward Plan (Pages 47 - 48)

To review and agree the Board's Forward Plan, attached.

15 Briefing Papers, Updates & Matters for Information

16 Dates of Future Meetings

Please note that dates of future meetings and conferences will be included in the Devon County Council meetings calendar.

Meetings
14 July 2022
20 October 2022
19 January 2023
6 April 2023

MEETINGS INFORMATION AND NOTES FOR VISITORS

Getting to County Hall and Notes for Visitors

For SatNav purposes, the postcode for County Hall is EX2 4QD

Further information about how to get to County Hall gives information on visitor parking at County Hall and bus routes.

Exeter has an excellent network of dedicated cycle routes. For further information see the Travel Devon webpages.

The nearest mainline railway stations are Exeter Central (5 minutes from the High Street), St David's and St Thomas. All have regular bus services to the High Street.

Visitors to County Hall are asked to report to Main Reception on arrival. If visitors have any specific requirements, please contact reception on 01392 382504 beforehand.

Membership of a Committee

For full details of the Membership of a Committee, please visit the Committee page on the website and click on the name of the Committee you wish to see.

Committee Terms of Reference

For the terms of reference for any Committee, please visit the Committee page on the website and click on the name of the Committee. Under purpose of Committee, the terms of reference will be listed. Terms of reference for all Committees are also detailed within Section 3b of the Council's Constitution.

Access to Information

Any person wishing to inspect any minutes, reports or background papers relating to an item on the agenda should contact the Clerk of the Meeting. To find this, visit the Committee page on the website and find the Committee. Under contact information (at the bottom of the page) the Clerk's name and contact details will be present. All agenda, reports and minutes of any Committee are published on the Website

Public Participation

The Council operates a Public Participation Scheme where members of the public can interact with various Committee meetings in a number of ways. For full details of whether or how you can participate in a meeting, please look at the Public Participation Scheme or contact the Clerk for the meeting.

In relation to Highways and Traffic Orders Committees, any member of the District Council or a Town or Parish Councillor for the area covered by the HATOC who is not a member of the Committee, may attend and speak to any item on the Agenda with the consent of the Committee, having given 24 hours' notice.

Webcasting, Recording or Reporting of Meetings and Proceedings

The proceedings of any meeting may be recorded and / or broadcasted live, apart from any confidential items which may need to be considered in the absence of the press and public. For more information go to our webcasting pages

Anyone wishing to film part or all of the proceedings may do so unless the press and public are excluded for that part of the meeting or there is good reason not to do so, as directed by the Chair. Filming must be done as unobtrusively as possible without additional lighting; focusing only on those actively participating in the meeting and having regard to the wishes of others present who may not wish to be filmed. Anyone wishing to film proceedings is asked to advise the Chair or the Democratic Services Officer in attendance.

Members of the public may also use social media to report on proceedings.

Declarations of Interest for Members of the Council
It is to be noted that Members of the Council must declare any interest they may have in any item to be considered at this meeting, prior to any discussion taking place on that item.

WiFI
An open, publicly available Wi-Fi network (i.e. DCC) is normally available for meetings held in the Committee Suite at County Hall.

Fire
In the event of the fire alarm sounding, leave the building immediately by the nearest available exit following the fire exit signs. If doors fail to unlock press the Green break glass next to the door. Do not stop to collect personal belongings; do not use the lifts; and do not re-enter the building until told to do so. Assemble either on the cobbled car parking area adjacent to the administrative buildings or in the car park behind Bellair.

First Aid
Contact Main Reception (Extension 2504) for a trained first aider.

Mobile Phones
Please switch off all mobile phones before entering the Committee Room or Council Chamber

Alternative Formats
If anyone needs a copy of an Agenda and/or a Report in another format (e.g. large print, audio tape, Braille or other languages), please contact the Customer Service Centre on 0345 155 1015 or email: committee@devon.gov.uk or write to the Democratic and Scrutiny Secretariat in G31, County Hall, Exeter, EX2 4QD.

Induction Loop available

HEALTH AND WELLBEING BOARD

13 January 2022

Present:

Councillors J McInnes (Chair), Y Atkinson, R Croad, A Leadbetter and A Saywell (remote)
Steve Brown, Director, Public Health
Melissa Caslake, DCC (remote)
Diana Crump, Joint Engagement Forum
Jonathan Drew, Healthwatch Devon
Lee Howell, Devon & Somerset Fire & Rescue Service
Jennie Stephens, DCC
Simon Kerr, CCG

Apologies

Dr P Johnson

Members attending in accordance with Standing Order 25:

Councillor J Brazil (remote)

*** 31 Minutes**

RESOLVED that the minutes of the meeting held on 28 October 2021 be signed as a correct record.

*** 32 Items Requiring Urgent Attention**

There were no items requiring urgent attention.

*** 33 Announcements**

The Chair made the following announcements:

(a) Mrs Mayes was welcomed, who was attending the meeting in her capacity as a Co-opted Member of the Council's Standards Committee to observe and monitor compliance with the Council's ethical governance framework.

(b) Dr Sarah Wollaston was the new Chair of the Integrated Care System for Devon, which would formally come into being on 1 July 2022.

34 Coronavirus update

The Director of Public Health updated the Board on the current position relating to the Coronavirus.

The Deputy Director stated that the Omicron variant was more transmissible and although offering milder symptoms, was still impacting hospitals. The latest data suggested a downward trajectory of the Omicron wave, which was optimistic but with schools having now returned, caution was needed. Of particular note with this wave was the high numbers of secondary school age students having antibodies from last September, aided with the vaccination programme.

It was hoped to see a peak in the next week or so, although other variants of the virus were expected, therefore a degree of caution was needed.

The Board were referred to the following available online data:

DCC Covid-19 Dashboard: Coronavirus dashboard and data in Devon - Coronavirus (COVID-19)

National Coronavirus Tracker: Daily summary | Coronavirus in the UK (data.gov.uk)

National Coronavirus Interactive Map: Interactive Map | Coronavirus in the UK (data.gov.uk)

* **35** **Devon Joint Health and Wellbeing Strategy: Priorities and Outcomes Monitoring**

The Board noted the Report from the Director of Public Health on the performance for the Board, which monitored the priorities identified in the Joint Health and Wellbeing Strategy for Devon 2020-25.

The indicator list and performance summary within the full report set out the priorities, indicators and indicator types, and included a trend line, highlighting change over time.

The latest Health and Wellbeing Outcomes Report, along with this paper, was available on the Devon Health and Wellbeing website.

The Report monitored the four Joint Health and Wellbeing Strategy 2020-25 priorities, and included breakdowns by local authority, district and trends over time. These priorities areas included:

- Create opportunities for all
- Healthy safe, strong and sustainable communities
- Focus on mental health
- Maintain good health for all

The indicators below had all been updated since the last report to the Board:

Mortality Rate from Preventable Causes (Under 75), 2020

The mortality rate from preventable causes for people aged under 75 per 100,000 in Devon was 107.7. This was statistically significantly lower than the England rate of 140.5. There was variation in the rate across the districts in Devon. East Devon, Mid Devon, South Hams, Teignbridge and West Devon had statistically lower rates than England and Exeter, North Devon and Torridge had a statistically similar rate to England.

Suicide Rate, 2018-20

The suicide rate in Devon per 100,000 was 11.9. This was statistically worse than the England rate of 10.4. Exeter, Mid Devon and Teignbridge were all significantly statistically worse than the England rate. East Devon, North Devon, South Hams, Torridge and West Devon were all statistically similar to the England rate.

Under 18s Conception Rate, 2019

The under 18s conception rate in Devon per 1,000 was 11.7. This was statistically significantly lower than the England rate of 15.7. The Devon districts are statistically similar to the England rate with the exception of South Hams which is statistically significantly lower.

Further data on mortality rates from preventable causes would be provided to the Board at a future date.

*** 36 Better Care Fund - Update**

(Councillor J Brazil attended in accordance with Standing Order 25(2) and spoke to this item.)

The Board considered the Report of the Locality Director (Care and Health) North and East, Devon County Council and NHS Devon Clinical Commissioning Group as to the Better Care Fund (BCF), which covered the planning and activity for Devon for 2021/22 and the latest information for 2022/23. The Health and Wellbeing Board had oversight of the BCF and was accountable for its delivery.

National planning requirements for the BCF were published in September 2021 and included the requirement to submit an annual plan by 16 November. This was achieved subject to formal Board approval at this meeting, the Board having first been circulated a narrative description of the plan for comment.

The report detailed the plan's priorities for 2021/22 as follows:

- Respond to the challenge of the Covid-19 Pandemic
- Further embedding of discharge to assess pathways
- Sustainability of the care market and care workforce
- Embedding the Community Mental Health Framework

The report also set out five new metrics introduced in 2021/22, which would be reported to the Board on a quarterly basis. These metrics were:

- Avoidable Admissions
- Length of stay
- Discharge to Normal Place of Residence
- Residential Admissions
- Reablement

It was expected that the planning requirements for 2022/23 would be published before the start of the year.

The Board and Officer discussion covered:

- it was noted that there was currently a joint review of the full dementia pathway planned between the CCG and Devon County Council taking place this year; and
- the lack of available housing for key workers particularly in rural areas.

RESOLVED that the Board note and endorse the national planning requirements and the Plan for Devon for 2021/22.

*** 37 Self-harm in Children and Young People**

The Board received a presentation from Public Health Devon relating to self-harm in children and young people. The presentation covered:

- National and local data;
- Local intelligence developments – development of an exploratory tool, initially focussed on self-harm and suicide;
- Wider determinants and risk factors – self-harm rates peaked in 16-24 year old women and 25-34 year old men;
- What are we doing? – Support for carers, Connect 5 training and Suicide prevention strategy; and
- Areas for development.

It was noted that Public Health Devon were working with the Devon Children and Families Partnership and the Board would be kept updated on that work.

The Board were referred to the health needs assessment on self-harm (Needs Assessments - Devon Health and Wellbeing) for additional information.

The Chair thanked Officers for the informative presentation and discussion, and looked forward to a further update in due course.

*** 38 Food Insecurity in Devon**

(Councillor J Brazil attended in accordance with Standing Order 25(2) and spoke to this item.)

(Councillor Y Atkinson declared a personal interest in this item by virtue of being a Trustee of the Charity, Exeter Food Action.)

The Board received the report from the Council's Head of Communities on Food Insecurity and the Council's emerging response and strategy.

The Covid-19 pandemic had highlighted a range of inequalities across Devon, including a rise in levels of poverty and food insecurity. During the last year, the Council had invested over £5m in the provision of food and essential supplies, particularly to those families eligible for free school meals. A further £5m would be available for this autumn/winter.

The report highlighted that the Council should continue to work with a range of partners on both the long-term opportunities to learn and develop change alongside the short-term distribution of support from funds, such as the Household Support Grant.

The following were the current priorities for the Council to develop in partnership, over the next 12 months:

- Deliver the Household Support Fund to families across Devon to 31 March 2022.
- DCC/District Councils to commission/grant fund development of Food Networks in Devon, working across VCSE partners.
- Work jointly on developing a new learning phase building on the experiences around food insecurity to link with wider hardship/welfare.
- Agree common Team Devon principles for welfare/hardship/support and wider poverty, where helpful .
- Develop a menu outlining a common offer with minimum expectations for each District area. Include consideration of digital inclusion and how data is shared.
- Develop a common Team Devon strategy for this work.

It was noted that the Exeter Food Action charity had linked up with FareShare, who were the UK's national network of charitable food redistributor.

*** 39 CCG Update**

The Board received the report of the Chair of the NHS Devon Clinical Commissioning Group which provided an update on CCG business, Devon-wide and national developments within the NHS. It was intended to provide the Board with summary information to ensure Members were kept abreast of important developments affecting the NHS.

The board noted updates, particularly on:

- Dr Sara Wollaston had been appointed Chair of the Integrated Care System for Devon (ICSD) and Jane Milligan as Chief Executive Officer for the new ICSD.
- Staffing pressures across the health and care system continued;
- The Emergency Department Survey Report - Healthwatch Devon

The Board briefly discussed the following:

- The merger of the RD&E and North Devon hospital trusts and improvements being made.
- The value of future composite reporting to the Board from the Council, Adult Social Care and CCG/ICS (as with current Scrutiny reporting).

*** 40 References from Committees**

Nil

*** 41 Scrutiny Work Programme**

The Board reviewed the Council's Scrutiny Work Programme in order to avoid any potential duplications.

*** 42 Forward Plan**

The Board considered the contents of the Forward Plan, as outlined below:

Date	**Matter for Consideration**
7 April 2022 **2.15pm**	**Performance / Themed Items** Health & Wellbeing Strategy Priorities and Outcomes Monitoring Theme Based Item (TBC) **Business / Matters for Decision** Better Care Fund - frequency of reporting TBC Integrated Care Systems Alcohol specific admissions in under-18s and links to deprivation Homeless Reduction Act – 12 month update VCSE partners & the opportunities available around the support for Covid-19 CCG Updates **Other Matters** Scrutiny Work Programme / References, Board Forward Plan, Briefing Papers, Updates & Matters for Information

14 July 2022, 2.15pm	**Performance / Themed Items** Health & Wellbeing Strategy Priorities and Outcomes Monitoring Theme Based Item (TBC) **Business / Matters for Decision** Better Care Fund - frequency of reporting TBC CCG Updates Self-Harm in Children & Young People update **Other Matters** Scrutiny Work Programme / References, Board Forward Plan, Briefing Papers, Updates & Matters for Information
20 October 2022, 2.15pm	**Performance / Themed Items** Health & Wellbeing Strategy Priorities and Outcomes Monitoring Theme Based Item (TBC) **Business / Matters for Decision** Better Care Fund - frequency of reporting TBC CCG Updates **Other Matters** Scrutiny Work Programme / References, Board Forward Plan, Briefing Papers, Updates & Matters for Information
19 January 2023	
6 April 2023	
Annual Reporting	Adults Safeguarding annual report (September / December) Joint Commissioning Strategies – Actions Plans (Annual Report – December) JSNA / Strategy Refresh – (June)

RESOLVED that the Forward Plan be approved.

*** 43 Briefing Papers, Updates & Matters for Information**

Members of the Board received regular email bulletins directing them to items of interest, including research reports, policy documents, details of national/ regional meetings, events, consultations, campaigns and other correspondence. Details were available on the Devon Health and Wellbeing website.

No items of correspondence had been received since the last meeting.

*** 44** **Dates of Future Meetings**

RESOLVED that future meetings of the Board would be held on the following dates.

7 April 2022
14 July 2022
20 October 2022
19 January 2023
6 April 2023

NOTES:

1. *Minutes should always be read in association with any Reports for a complete record.*
2. *If the meeting has been webcast, it will be available to view on the webcasting site for up to 12 months from the date of the meeting*

*** DENOTES DELEGATED MATTER WITH POWER TO ACT**

The Meeting started at 2.15 pm and finished at 4.23 pm

Devon Health and Wellbeing Board

Health and Wellbeing Outcomes Report

Report of the Chief Officer for Communities, Public Health, Environment and Prosperity

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper and accompanying presentation introduces the updated outcomes report for the Devon Health and Wellbeing Board.

2. Summary of the Health and Wellbeing Outcomes Report, April 2022

2.1 The full Health and Wellbeing Outcomes Report for **April 2022**, along with this paper, is available on the Devon Health and Wellbeing website: www.devonhealthandwellbeing.org.uk/jsna/health-andwellbeing-outcomes-report. The report monitors the four Joint Health and Wellbeing Strategy 2020-25 priorities, and includes breakdowns by local authority, district, and trends over time. These priorities areas include:

- **Create opportunities for all**
- **Healthy safe, strong and sustainable communities**
- **Focus on mental health**
- **Maintain good health for all**

Seven indicators have been updated with new data and are as follows:

- **Alcohol-Related Admissions (Narrow), 2020/21**

The alcohol related admission rate per 100,000 in Devon is 424.3. This is statistically better than the England rate of 455.9. East Devon, Mid Devon, South Hams and West Devon are all statistically better than the England average and Exeter and North Devon are statistically worse.

- **Cancer Diagnosed at Stage 1 or 2, 2019**

The proportion of cancer diagnosed at stage 1 or 2 rate for Devon is 57.8%. This is statistically better than the England value of 55.1%. However, most areas in Devon are statistically similar to England, with only East Devon and Exeter performing statistically better.

- **Emergency Hospital Admissions for Intentional Self Harm, 2020/21**

The rate of emergency hospital admissions for intentional self harm in Devon is 211 per 100,000, which is statistically worse than the England rate of 181.2. Exeter, Mid Devon, North Devon and Torridge are all significantly worse than the England rate and only West Devon is statistically better.

- **Injuries Due to Falls, 2020/21**

The rate of injuries due to falls in Devon is 1662.4 per 100,000. This is statistically better than the England rate of 2023.0. Almost all areas in Devon are statistically better than the England rate except for North Devon and West Devon which are statistically similar.

- **Reablement Services (Effectiveness), 2020/21**

The proportion of older people (65 and over) who were still at home 91 days after discharge from hospital into reablement services in Devon is 67%. This is statistically significantly worse than the England proportion of 79.1%. All local authority areas in Devon are also significantly worse than the England rate.

- **Self Reported Wellbeing (Low Happiness Score), 2020/21**

The percentage of people self reporting low happiness was 7.2% for Devon. This is statistically significantly better than the England proportion of 9.2%.

Please note that many outcome indicators demonstrate health and wellbeing inequalities across smaller areas which may not always be apparent when observing only the Devon figure.

Please refer to the Devon Health and Wellbeing Outcomes report for a full list of indicators.

3. Future developments to the Devon Health and Wellbeing Outcomes Report

3.1 The interactive Outcomes Reporting tool has been developed and can be found on the Devon Health and Wellbeing website Health and Wellbeing Outcomes Report - Devon Health and Wellbeing

3.2 An easy read version of the Devon Health and Wellbeing Outcomes report is also in development, with delays caused due to the Coronavirus global pandemic.

4. Legal Considerations
There are no specific legal considerations identified at this stage.

5. Risk Management Considerations
Not applicable.

6. Options/Alternatives
Not applicable.

7. Public Health Impact
The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcome indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.

Health and Wellbeing Board
7 April 2022

BETTER CARE FUND - UPDATE

Report of the Interim Director of Integrated Care (Devon County Council and NHS Devon Clinical Commissioning Group)

Please note that the following recommendations are subject to consideration and determination by the Committee before taking effect

Recommendation:

1. That the Health & Wellbeing Board notes the latest performance data and national requirements.

~~~~~~

1. Background/Introduction

The Better Care Fund (BCF) is the only mandatory policy to facilitate integration between Health and Social Care, providing a framework for joint planning and commissioning. The BCF brings together ring-fenced budgets from Clinical Commissioning Group (CCG) allocations, the Disabled Facilities Grant and funding paid to local government for adult social care services. The Health and Wellbeing Board has oversight of the BCF and is accountable for its delivery.

2. Performance in 2021/22

As reported at the last Health & Wellbeing Board, government has amended the set of key BCF metrics in its planning for 2021/22. Latest performance for those metrics is as follows.

2.1 Avoidable Admissions

The NHSE figure used for avoidable admissions is based on a complex weighting formula using an apportionment based on full year activity, so it is not possible to provide an accurate current position at this time.

2.2 Length of Stay

	2021-22 Q3 plan	2021-22 Q4 plan
Proportion of inpatients resident for 14 days or more	13%	13%
Proportion of inpatients resident for 21 days or more	7%	7%

The aim is to maintain achievement to year end as set out in the above table. Achievements of these targets will be challenging due to pressures including high
~~~~~~

demand, the complex caseload and community capacity. Latest Performance (up to & including January) remains as per the plan i.e.13% & 7% respectively.

2.3 Discharge to Normal Place of Residence

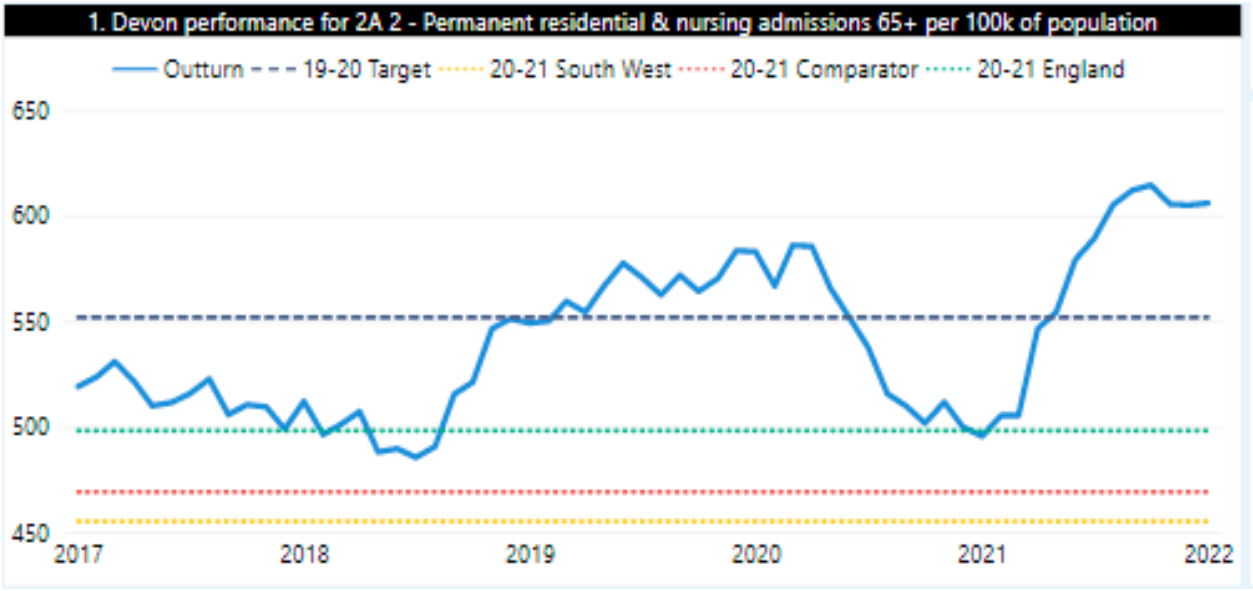
The current ambition for Devon is to achieve 92% for this target at year end. Latest Performance (up to & including January) remains as per the plan i.e. 92%.

2.4 Residential Admissions

Long term support needs of older people (aged 65 & over) met by admission to residential & nursing care homes, per 100,000 population.

2019-20 Plan	2019-20 Actual	2020-21 Actual	2021-22 Plan
564	539	510	520

Performance to January 2022 = 606.5 per 100,000 population (65 and over)



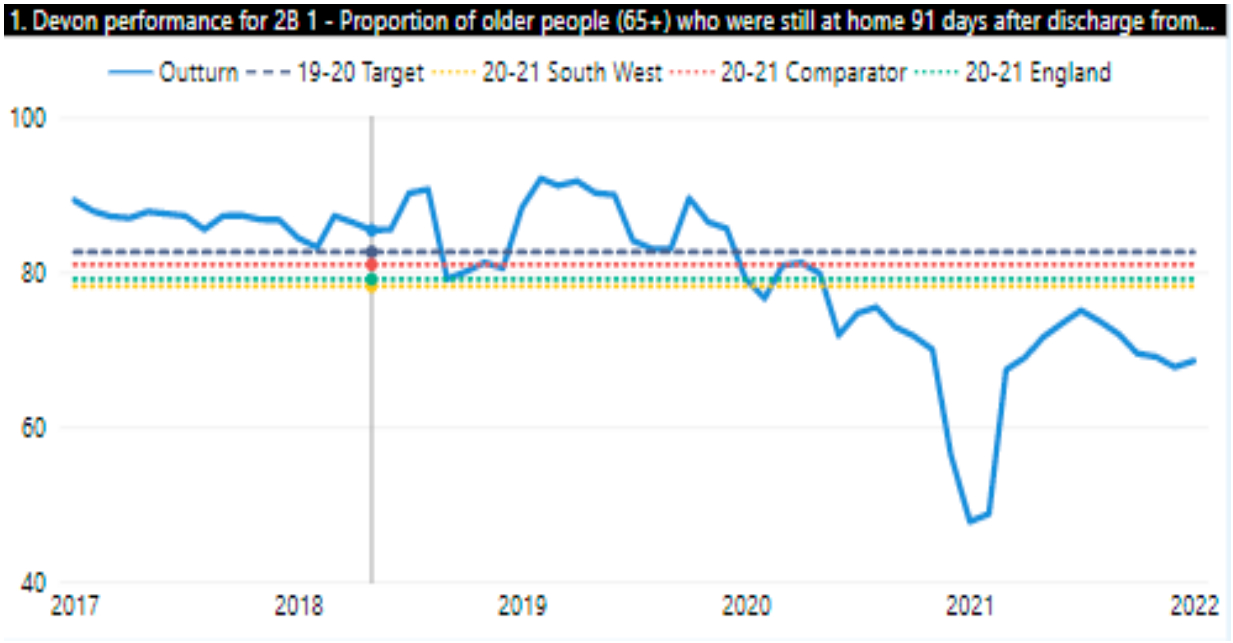
Performance against this indicator has been static for a number of months with 1,260 service users reported in the numerator of the indicator.

2.5 Reablement

Proportion of older people (65 & over) who were still at home 91 days after discharge from hospital into reablement / rehabilitation services.

2019-20 Plan	2019-20 Actual	2021-22 Plan
82.6%	85.8%	79.3%

The plan is based on numbers achieved in the five years to 2020-21.
Performance to January 2022 = 68.5% (466/680)



We have seen a reducing performance trend against this indicator for about 6 months resulting from reducing numbers in both the numerator and denominator. It should be noted that the performance assessment is indicative. This metric focusses on a specific older persons cohort discharged into rehabilitation & reablement services in the period 1/10/21-31/12/21 with outcomes tracked in the period 1/1/22-31/3/22.

3. National Update

Government has indicated its intention to continue with the BCF for 2022/23 and in that year introduce further development of the BCF for future years.

Although initially expected in March, it is understood that the national announcement of Planning and Reporting Guidance for 2022/23 will be published in May.

Public Health Devon

Devon County Council

Annual Health Protection Assurance Report for the Health and Wellbeing Boards of Devon County Council, Plymouth City Council, Torbay Council and Cornwall and the Isles of Scilly Councils

2020/2021

March 2022

PLYMOUTH CITY COUNCIL

TORBAY COUNCIL

CORNWALL COUNCIL

Council of the ISLES OF SCILLY

Contents

1. Introduction

1.1 This report provides a summary of the assurance functions of the Devon, Cornwall and Isles of Scilly Health Protection Committee and reviews performance for the period from 1 April 2020 to 31 March 2021, for the Health and Wellbeing Boards of Devon County Council, Plymouth City Council, Torbay Council, Cornwall Council and the Council of the Isles of Scilly.

1.2 Due to the time lag in receiving the annual reporting data for 2020/21, the report contains some information in relation to activities undertaken in 2021/22, to provide a more timely picture of progress.

1.2 The report considers the following key domains of Health Protection:

- Communicable disease control and environmental hazards
- Immunisation and screening
- Health care associated infections and antimicrobial resistance
- Emergency planning and response.

1.3 The report sets out for each of these domains:

- Assurance arrangements
- Performance and activity during 2020/21
- Actions taken to date against health protection priorities identified for 2020/21
- Priorities for 2021/22.

1.5 The health protection agenda in 2020/21 was dominated by the COVID-19 pandemic. This report therefore focuses on the response to the pandemic, the impact on wider health protection activity, and work to recover screening and immunisation coverage for our population.

2. Assurance arrangements

2.1 Local authorities, through their Director of Public Health, have an assurance role to ensure that appropriate arrangements are in place to protect the health of their populations.

2.2 The Devon and Cornwall Health Protection Committee is mandated by the Health and Wellbeing Boards of Devon County Council, Plymouth City Council, Torbay Council, and Cornwall Council and the Council of the Isles of Scilly to provide assurance that adequate arrangements are in place for prevention, surveillance, planning, and response to communicable disease and environmental hazards.

2.4 Summary terms of reference for the Committee and affiliated groups are listed at **Appendix 1**.

2.5 A summary of organisational roles in relation to delivery, surveillance and assurance is included at **Appendix 2**.

2.6 A major organisational change has been the transition from Public Health England (PHE) to the UK Health Security Agency (UKHSA) which took place in October 2021. This is outside the timescale for this annual report but for practical purposes the organisation is referred to as PHE/UKHSA throughout.

3. Prevention and control of infectious disease

3.1 At the end of December 2019, Wuhan Municipal Health Commission, China, reported a cluster of cases of pneumonia. The situation escalated rapidly and on 30 January 2020 the Director-General of the World Health Organisation declared the novel coronavirus outbreak a public health emergency of international concern (PHEIC) as sporadic cases were now being seen across countries outside of China.

3.2 By the end of January 2020 the first two cases of coronavirus (2019-nCoV) in the United Kingdom were confirmed and, over the course of February, single and linked cases were being identified across the UK and outbreaks were being confirmed across Europe, notably Italy, France and Spain.

3.3 By mid-March 2020, as the UK Chief Medical Officers raised the risk to the UK from moderate to high, the first COVID-19 cases and situations in Devon and Cornwall involving single cases, schools and care homes were being identified. On 26 March 2020, the UK went into lockdown with the instruction to Stay at Home, Protect the NHS, Save Lives.

Activity in 2020/21

3.4 PHE/UKHSA, peninsula local authorities and CCGs worked in partnership to support settings with high-risk cases or outbreaks of COVID-19. Common settings where an outbreak response is required include care homes, supported living settings, early year and education settings, health care settings, workplaces (particularly those associated with national infrastructure or are otherwise high risk) prisons and homelessness settings. Table 1 shows the number of COVID-19 situations recorded on HPZone (PHE/UKHSA case management system) by principal context and local authority area in the year 2020-2021. This will be a significant under representation of the number of settings reported as it does not include situations where the local authority led the response. For example, where the local authority led on providing a response to local schools or workplaces these will not be included in the setting figures below.

Table 1 Number of Covid-19 situations recorded on PHE/UKHSA system between 1 April 2020 – 31 March 2021 by Local Authority and setting type

Local Authority	Adult Care Home or Setting	Educational setting (inc residential)	Workplace	Healthcare	Other
Cornwall	225	32	35	6	9
Devon	341	72	42	15	20
Plymouth	133	36	18	5	14
Torbay	96	<5	14	<5	5

3.5 The above includes the first Covid-19 Outbreak in the South West which occurred in Torbay in early March 2020, during the initial containment phase of the national pandemic response.

3.6 PHE/UKHSA regional Health Protection Teams provided the specialist response to other infectious disease and hazard related situations across Devon and Cornwall, supported by local, regional and national expertise. Situations responded to alongside management of COVID-19 have included:

- Gastro-intestinal outbreaks in early years, schools and residential care settings
- Environmental exposures
- Exposure to Brucella Canis from contact with infected canines
- TB in the workplace

Are of response	Detail
Public Health advice	Public health advice was developed and disseminated in relation to the identification and management of symptoms, case and outbreak response, promotional campaigns, and support for all sectors in relation to the pandemic. Proactive support was provided through a suite of assets and communication tools hosted by local authority, CCG and PHE/UKHSA agencies. Examples include early year and education setting regular webinars, care home webinars, flow charts communicating actions to take following possible or confirmed case(s), checklists and risk assessment tools.
Contact tracing	PHE / UKHSA, working with local authority public health teams and NHS Test and Trace, led the process of contact tracing, testing and isolation, interpreting and implementing changing national guidance during the phases of the pandemic
Testing	*Area of local good practice*  Testing was coordinated across Devon and Cornwall by a regional testing strategist, bringing together clinical, commissioning and public health expertise regularly to review latest guidance and manage implementation in the most effective way for a geographically dispersed population. Testing capacity and capability was targeted to ensure all communities were able to access symptomatic and asymptomatic testing services, taking into account the needs of those without easy access to transport, and vulnerable populations. Targeted community testing, including deployment of fixed and mobile PCR and LFD testing sites, was used to maximise testing uptake across the peninsula.
Vaccination	*Area of local good practice* 

	COVID-19 and flu vaccination programmes were co-managed as a seasonal vaccination programme, channelling resource and expertise in the most effective way. A particular focus was the work to identify and target areas of vaccine inequality. Health equity audits were undertaken to identify groups and areas of practice to be addressed. An infection control site toolkit was developed, and bespoke vaccination sessions were organised for people who were homeless, people with a learning disability, and people with complex lives. A community engagement officer, and a vaccine hesitancy nurse, were appointed by the CCG to support this work. Local authorities worked with the CCG to develop the outreach offer, through use of all vaccine partners – CCG, acute trusts, GPs and pharmacies, and use of community settings in areas of high deprivation and low uptake.
Variants of concern	PHE/UKHSA led the response to investigating single cases and outbreaks of variants of concern, working closely with local authorities to ensure containment and, in the case of Delta and Omicron, mitigate spread.
Infection prevention & control	*Area of local good practice 1*  The Devonwide Community Infection Management Service commenced in April 2020 and has been central to the COVID response across the whole of Devon as well as to developments in wider infection prevention and control. The service operates a hub and spoke model with expertise based in each of the four acute hospitals in Devon reaching out to support the care sector. This approach enabled more intensive specialist support for outbreak prevention and control than would be been possible before. One particular area of innovative practice was the development of 'virtual infection control tours' where the team was able to walk round a care home via the Manager's iPAD, and to advise on infection control measures in a much more practical way, for example cleaning, and PPE donning and doffing arrangements. *Area of local good practice 2* 

	A small team of two infection prevention and control nurses was employed by Devon, Plymouth and Torbay local authorities, hosted by Devon, and gave infection control advice to a range of non-NHS settings to support the COVID response. This reached out to settings such as businesses, schools, factories, and homeless hostels. The practitioners developed a range of IPC resources including checklists, posters and guidance documents as well as delivering training and education to these settings to complement national resources. These included: • 'Ready for Anything', a full IPC guide to support workplaces and businesses beyond the pandemic, which was added to the Heart of the South West Growth Hub. • IPC information posters for events • IPC self-assessment checklists to support the COVID-19 vaccination clinics, temporary accommodation for homeless settings, bridging hotels and education settings.
PPE	*Area of local good practice*  The Devon Public Health team took a lead role, in partnership with PHE/UKHSA, in developing South West wide guidance in the use of PPE for non NHS settings. This enabled decisions to be made to protect both staff and residents at a time when national guidance was not yet available to guide local practice.
Settings based prevention & case & outbreak response	Prevention and response programmes were developed for all settings to prevent and control outbreaks: • Schools and early years • Care homes and domiciliary care • Businesses & hospitality • Places of detention • Homelessness settings New and productive relationships were built with all sectors to support them to keep staff, clients and students safe, minimise disruption and keep premises open and functioning.
Communications & engagement	*Area of local good practice*  Local Outbreak Engagement Boards in each local authority brought together stakeholders from health and care, education, business, hospitality, voluntary and community sectors, faith

	groups, police and other sectors to feed into local policy and ensure clear communications to all parts of the community. 'Covid Champions' networks were established to influence communications and share key messages around COVID safe behaviours through professional, social and community networks. THE PLYMOUTH GOOD NEIGHBOURS SCHEME

Surveillance Arrangements

3.8 UKHSA provides a quarterly report to the Committee containing epidemiological information on cases and outbreaks of communicable diseases of public health importance at local authority level.

3.9 Fortnightly bulletins are produced throughout the winter months, providing surveillance information on influenza and influenza-like illness and infectious intestinal disease activity, including norovirus. These bulletins report information for the UKHSA (South West). UKHSA also provides a list of all community outbreaks all year round.

3.10 The Devon Health Protection Advisory Group, led by UKHSA and convened quarterly, provides a forum for stakeholders, including hospital microbiologists, environmental health officers, consultants in public health, water companies and infection control nurses, to share intelligence and any risks identified in local arrangements to manage communicable disease incidence.

4 Screening programmes

4.1 This section summarises some of the key developments for the individual screening programmes during 2020/21.

4.2 All screening programmes suffered from the impact of the COVID-19 pandemic to varying degrees with the focus during 2020/21 to support providers to safely pause programmes where this was necessary or required, for example due to infection, prevention and control reasons, and then to develop and implement detailed recovery plans to safely recommence screening and tackle the backlog that had developed during the pandemic to return programmes back to a business as usual footing. For some programmes, this has required significant investment, both regional and national to increase capacity over and above 100% to be able to deliver screening in a COVID-19 secure manner (for example, longer appointments to follow PPE and IPC procedures) and to offer screening to all those individuals who were affected by the pause in the programmes in as timely a way as possible. As a consequence, this investment has been designed to build in increased capacity to ensure more robust and sustainable services into the future.

4.3 The impact of the COVID pandemic has meant that there have been challenges meeting some national standards (for example, round length and coverage) and for these areas, action plans and improvement plans are in place alongside the recovery plans.

4.4 The following table gives a summary of performance, challenges and developments during 2020/21 and future developments.

Screening programme:	
Bowel	Both routine and surveillance programmes had to be paused at the start of the pandemic due to a number of factors, including IPC concerns at colonoscopy. Invitations were recommenced in a phased way to enable providers to manage flow of patients through the screening pathway and providers increased invitation rates and colonoscopy capacity (compared to pre-Covid) in order to recover backlogs. All providers met the national recovery ambition. As part of the national recovery plan, bowel scope screening was paused and then a decision made to cease this programme. Any individuals who were invited to bowel scope screening but were not able to be screened due to the pause of services were invited to bowel screening. In addition to recovery, nationally, age extension of the bowel cancer screening programme commenced from mid May 2021. This is a 4-year extension programme starting with 56-year olds in 2021-22 to include 50 year olds by 2024-25. All providers have commenced age extension to 56-year olds with a plan to launch age 58 invites in Q1 2022/23 in line with national guidance, subject to regional finance allocations. It has been agreed that screening of individuals with Lynch syndrome will be introduced in 2023/24 with planning around process, IT systems and finance led nationally in 2022/23.
Breast	All services were affected by the pandemic with routine screening paused initially at the start of the pandemic due to a number of factors, including IPC concerns on the mobile screening vans. Screening for those at high-risk continuing throughout. As part of the national recovery plan, the national Age Extension breast screening trial ceased recruiting. The national recovery ambition is for all providers to recover by end March 2022. Based on current trajectories, 2 Devon providers are on track to recover within this timeline, one within a few weeks of this date and the other July 2022. Women waiting longest have been invited first and at the time of this report providers are inviting women within approximately 8 weeks of their due date. Provider recovery plans have required significant new investment, both regional and national, to increase capacity sufficiently above 100% to offer screening to all individuals delayed screening within the national timeline. This has been able to address pre-COVID-19 issues in staffing levels and aging equipment that will ensure more robust and sustainable services into the future. Until the backlog is cleared and round length is fully recovered, it is not possible fully to determine the impact of the pandemic on uptake and coverage. This is being closely monitored and text messaging has been introduced in all programmes as an additional reminder to women and to help to reduce wasted slots. Work also continues with GP practices to encourage ladies to attend when due. A project has been started to see whether an online booking solution can be developed. Providers will be completing the PHE/UKHSA Health Equity Assessment Tool during 2022/23 and developing action plans.

Cervical	At the start of the pandemic, a national decision was made to temporarily pause invitations to cervical screening. All other components of the cervical screening pathway continued throughout albeit at reduced capacity for a short period. Due to social distancing and IPC requirements, local colposcopy teams paused seeing women with low grade referrals for a short period. Letter invitations for Devon and Cornwall recommenced on 05/06/2020 and the programme has been running as expected since that time, with some fluctuation in laboratory turnaround time due to temporary staff sickness/self-isolation throughout the pandemic. This has been a national issue with all labs affected to some degree. Uptake data suggests that this has been stable and a project has been carried out to review GP practice level data and provide support and resources to those with lower uptake. A national pilot of self-sampling has commenced.
Antenatal/ Neonatal	All antenatal screening programmes were maintained throughout COVID as a core part of routine maternity care. All providers continue to provide a full service and are in the main meeting BAU national standards. Newborn and infant examination (NIPE) and Newborn bloodspot screening (NBBS) were also maintained as core part of maternity and neonatal care. An initial impact on the NIPE 6-week hip scan for at risk babies was fully recovered by the Autumn 2020. The enhanced newborn targeted Hepatitis B vaccination programme was successfully implemented on 01/04/2021 in all providers, meeting the national deadline. Non-invasive Perinatal Testing (NIPT) was successfully implemented on 01/06/2021 in all maternity providers, meeting the national deadline. The national evaluative Severe Combined Immunodeficiency (SCID) programme went live on 01/09/2021. The SW is not part of this evaluative roll-out so babies born in the SW will not be screened for SCID and providers only need to be aware of implications for babies that move in at this stage. All the required changes in maternity, the newborn lab, CHIS and BCG providers have been implemented. Key implications are that BCG vaccination will be given around 28 days after checking the SCID result, and GP practices must check for a SCID result before giving Rotavirus vaccination (live vaccine).
New-born Hearing	There was significant disruption from COVID to the delivery of newborn hearing services affecting Devon and Cornwall due to the community model. The backlog due to COVID has been fully recovered. A further NHSP national assurance exercise took place during August 2021 and confirmed that recovery has been maintained. The Devon Local Authority Health Visitor Service gave notice to cease providing the first newborn hearing screen from end March 2022. A new provider has been identified for Devon and enhanced contracts agreed for Plymouth and Torbay providers. Mobilisation work is progressing, led by Devon CCG, to take over the service from the 01/04/2022.
Diabetic Eye	All services were affected by the pandemic as most venues for screening are in the community and GP surgeries, which had to close for long periods

	of time. Routine screening was paused initially, however screening for those at high-risk continued throughout. The national recovery ambition is for all providers to recover by end March 2022 (plus 6 weeks) and all providers are on track to recover within this timeline, and are training their own staff in Slit Lamp Bio-microscopy to ensure these patients are also seen in a timely way by April 2022. Hospital Eye Service capacity is a long-standing issue compounded by the impacts of COVID. Potential programme changes are being considered at a national level to address this including the introduction through Section 7a of Optical Coherence Tomography. National meetings are taking place to discuss extending the screening interval for low-risk patients from one year to two years. All programmes have completed the PHE/UKHSA Health Equity Assessment Tool and action plans are being developed.
Abdominal Aortic Aneurysm (AAA)	All services were affected by the pandemic as most venues for screening are in the community and GP surgeries, which had to close for long periods of time. Routine screening was paused initially and screening for those at high-risk continued throughout. The national recovery ambition is for all eligible men in the 2021/22 cohort to be invited for screening by end March 2022 (+2 months) in line with the national standard and all providers are on track to recover within this timeline. Investment to support recovery has led to increased capacity through funding additional staff, equipment and venue hire. All programmes have tracked the progress of each referral made to vascular surgery and taken action actively to manage any delays to assessment or subsequent treatment. However, meeting national quality targets is challenging due to ongoing pressures in Acute Trusts, including theatre space and ICU beds. All programmes have completed the PHE/UKHSA Health Equity Assessment Tool and action plans are being developed.

5 Immunisation programmes

5.1 This section summarises some of the key developments for the individual immunisation programmes during 2020/21.

5.2 National pandemic guidance prioritised the continuation of all immunisation programmes to ensure that public health protection was maintained and outbreaks of vaccine preventable diseases were prevented.

5.3 The impact of the COVID pandemic has meant that there have been challenges meeting some national standards in some programmes (for example, recommended intervals between doses and coverage) and for these areas, action plans and improvement plans are in place alongside the recovery plans.

5.4 The following table gives a summary of performance, challenges and developments during 2020/21 and future developments.

Immunisation programme:	
Primary childhood immunisations	All practices continued to deliver the routine child immunisation programmes throughout the pandemic. Routine data collections that monitor uptake and coverage (COVER) do not provide timely data so the SW Screening and Immunisation Team worked with the Child Health Information Services to develop new real-time data sets that have enabled close monitoring of the impact of the pandemic. These have shown that uptake of primary immunisations has been maintained. Annual COVER data for 2021/22 is also reassuring. The real-time datasets however do show that for immunisations at 12 months of age and at 3 years 4 months a larger proportion of children are not immunised as close to the age of eligibility as is recommended. Further investigations will be taking place and improvement plans put in place as necessary.
School-aged immunisations	The SAI programme has been severely impacted by the pandemic due to the initial lockdown, the second wave of school closures, and ongoing outbreaks that have prevented immunisation teams attending schools for clinics. These factors prevented the 2019/20 programme being completed in the Spring and Summer terms 2020 and have continued to impact delivery of the 2020/21 programme. In addition, the COVID vaccination programme for 12-15s and the expanded flu vaccination programme has impacted the 2021/22 programme. Both DCIOS providers restarted immunisation clinics during the first COVID lockdown have worked hard to deliver as much of the routine programme as possible as well as catch-up clinics over the summer periods. The aim is to complete the routine programme for those in 2019/20, 2020/21 and 2021/22 cohorts by the end August 2022. The Cornwall programme had nearly completed the routine programme at the time of the first lockdown in 2020 and was able to achieve expected uptake levels for the 2019/20 cohort. Uptake for the 2020/21 cohort are also good. The Devon programme was significantly disrupted by the first lockdown has had large numbers of clinics due in the Spring/Summer 2020 terms and due to the ongoing challenges with delivery of the routine programme and catch-up clinics. The provider was also heavily impacted by involvement in the delivery of the covid programme for 12-15s. Uptake at this stage is therefore lower and it is hoped will improve by the end August 2022. Work is still underway to complete HPV for the 2020/21 cohort, which is the clinical priority and some second doses may extend into the coming academic year. Business cases are being developed to expand the provider workforce to achieve the ambition to complete the routine programme for those in 2019/20, 2020/21 and 2021/22 cohorts by the end August 2022.
Vaccinations in pregnancy	Vaccination has continued throughout the pandemic in maternity and GP setting, however, maternity providers have reported significant challenges in delivering vaccines due to ongoing workforce pressures with staff regularly diverted to cover clinical duties. As a consequence,

	flu vaccines delivered in antenatal settings are below levels in previous years. There are also ongoing challenges with data quality as vaccinations given in maternity need to flow to GP practices so these can be recorded in the medical record and captured in IMMFORM that is the source of routine reporting. Most Trusts are now using NIVS for flu vaccinations that helps with data flows to GPs however this is not the case for pertussis vaccinations. Work to improve data flows is ongoing.
Older people immunisations	Singles and pneumococcal immunisations for older people have been maintained throughout the pandemic. However, as this group was advised to self-isolate (and many will have been in the group recommended to shield) the offer of these vaccinations is likely to have been disrupted. To mitigate against this the eligibility for the vaccination was temporarily extended nationally for those that would have turned 80 during 2020/21 to enable them to access the vaccination. The Screening and Immunisation Team has undertaken work to identify practices with lower uptake, developed a toolkit to support improving uptake and has run a communications campaign to encourage those aged 70-80 years old to attend for vaccination. This work is ongoing. Low levels of pneumococcal vaccinations continue due to global shortages of vaccine, and national prioritisation advice is in place to support GP practices.
Flu immunisations	The flu vaccination programme has continued to be a priority during the 2020/21 and 2021/22 programmes with extension to the eligible groups (2021/22 addition of years 8-11 and those aged 50-64byears) placing pressure on GP practices and Schools immunisation providers at the same time as delivering the COVID vaccination programme. Delivery through community pharmacy has expanded to support the programme. Multi-agency arrangements were established in Devon and Cornwall to manage the delivery of the seasonal vaccination programmes including both COVID-19 and influenza.

6 Health Care Associated Infections

6.1 The following table summarises the key performance position and developments for health care associated infections over 2020/21. Note that targets were relaxed due to the pandemic.

Infection type:	
MRSA	*Devon:* There were 8 cases over 2020/21, for an overall rate of 0.68/100,000. The majority or MRSA cases were community-associated and unlinked. *Cornwall:* There were a total of 5 cases over 2020/21, an overall rate of 0.89/100,000. Two cases were inpatients with previous MRSA history and the remaining three cases were unlinked.

MSSA	*Devon:* There were 312 cases over 2020/21, for an overall rate of 26.4/100,000. MSSA bacteraemia rates continued to be steady, with higher variability in NDHT and TSDFT due to the smaller population in these areas. *Cornwall:* There were a total of 138 cases over 2020/21, with an overall rate of and 24.5/100,000. 11 cases below the incidence of previous year 2019-20.
***C. difficile* Infection**	*Devon:* There were 311 cases over 2020/21, for an overall rate of 26.3/100,000. During 2020/21 there was limited scope for investigation and analysis of community cases, despite the new team set up to do so; this is due to that team having to pivot to offering pandemic support. Cases did not rise significantly during this year. *Cornwall:* There were a total of 192 cases over 2020/21, an overall rate of 34.1/100,000, a total of 44 cases above threshold. Limited scope for investigation due to COVID-19 pandemic pressures, employment of C. diff investigative members of staff started in February 2021.
***E. coli* Bacteraemia**	*Devon:* There were 1009 cases over 2020/21, for an overall rate of 85.0/100,000. Projects for *E. coli* reduction have been limited by the necessities of the pandemic response. *Cornwall:* There were a total of 438 cases over 2020/21, an overall rate of 77.7/100,000. General GNBSI and E. coli reduction were limited due to system pressures and COVID-19 pandemic.
Antimicrobial resistance	*Devon:* AMR group meetings recommenced in the latter half of 2020/21, however the Chair and primary care lead for the group stood down during 2020/21 and this, along with the impact of the pandemic, limited action during the year. *Cornwall:* The AMR planning and delivery group held two meetings in 2020/21, but due to system pressures and COVID-19 pandemic were not held as regularly as hoped. Cornwall Antibiotic Resistance Group (CARG) continued to operate during 2020/21 where possible, as a 'one health' group with representation from human and animal health sectors.

6.2 The key challenges for 2021/22 include strengthening the antimicrobial resistance programme, continuing to support the COVID-19 response, implementing *E. coli & C. difficile* reduction strategies, and ensuring consistent information and analysis from community infections.

7 Emergency planning and response

7.1 Emergency planning was dominated during 2020/21 by the response to the pandemic. This involved a very substantial amount of work during the year and substantially challenged our systems to deliver. In summary the response involved:

- Activation of emergency structures
  - A strategic co-ordinating group was established to manage the local response in support of the UK's response to COVID-19. This SCG structure ensured the effective co-ordination of the Local Resilience Forum and other specialist resources.
  - To maximise co-ordination across the Peninsula, one Tactical Co-ordinating Group for DCIOS was established rather than four across the area.
  - Organisations across DCIOS stood up their incident management structures and held desk-top exercises.
  - With the need for local multi-agency working groups to respond to COVID-19 below the level of the LRF-wide Tactical Co-ordinating Group (TCG), local Operational Incident Cells were also established.
  - Logistical supply chains were set up for obtaining and co-ordinating PPE supplies.
  - The South West Regional Strategic Coordination Group instigated in response to the pandemic will be further developed as a concept post COVID-19.

7.2 In addition to the pandemic response there were a number of other events during 2020/21:
- Large fire in Cornwall which required a health and public health response
- Flash flooding in Barnstaple
- XR day of action event.

7.3 Despite the pandemic, local and regional exercises were held over the period.

7.4 It is safe to say that the year 2020/21 saw unprecedented challenges across health and social care systems. The primary focus was on responding and adapting to the issues and risks that arose, from which substantial learning, improvement and good practice has been, and continues to be, identified. Our EPRR professionals have met this challenge.

8. Work Programme Priorities 2020/21- Progress

8.1 Progress against 2020/21 priorities is set out below.

	Priority	Progress on delivery
1	Continue to support the COVID-19 pandemic through national, regional and local response, preventing disease transmission and responding to situations and outbreaks. Locally this will be delivered through the Local Outbreak Management Plans and associated local Health Protection and Local Engagement Boards.	The whole system worked together to deliver a comprehensive COVID-19 prevention and response programme. Local Outbreak Management Plans were developed and revised through each pandemic phase, guiding local action.
2	Support the implementation of emerging interventions aimed at reducing COVID-19 transmission.	This work has focused on the vaccine roll out programme, ensuring high levels of uptake across the population and specifically in target groups where uptake is traditionally lower. Work has also continued to promote and support delivery of the community testing

		programme, ensuring PCR and LFD testing is available and signposted for symptomatic and asymptomatic individuals. UKHSA and Local Authority public health teams have also supported surveillance initiatives such as waste water testing, and variant response including surge testing.
3	Work with our partners across the system to identify, mitigate and monitor for the effects of COVID-19 on the health protection system and the services it delivers.	Under the Local Authority COVID-19 Health Protection Boards, all partners worked collaboratively to put in place systems for prevention, early identification, advice and guidance, response and engagement. Monitoring of COVID-19 impact has taken place at a number of levels, through daily system business information reporting, identification of trends, and information to monitor impact and inform the pandemic recovery.
4	Work with our partners across the health protection system to support the restoration of key health protection public health services and activities disrupted by COVID-19.	The pandemic continued in acute phase throughout 2020/21, with recovery activities largely postponed into 2022. However the joint work on the COVID response laid foundations for greater post pandemic resilience and effective partnership working to address all areas of health protection. Work to recover screening and immunisation services progressed during the year and all services have returned to normal operation or are on track to do so. New systems to tackle foodborne diseases were put in place via an MoU between UKHSA and Local Authority Environmental Health teams, and new systems to identify and manage infectious disease outbreaks in care homes are being introduced.
5	Work with our partners across the health protection system to support the restoration of the screening programmes disrupted by COVID-19.	NHSEI and the PHE Screening and Immunisation Team worked closely with all screening providers to ensure that backlogs were cleared by the national recovery targets. Apart from a few exceptions this has been achieved ahead of, or will be achieved by, these targets. Progress is being actively monitored and plans are in place.
6	Work with our partners across the health protection system to support the recovery of the immunisation programmes disrupted by COVID-19.	
7	Continue efforts to ensure high uptake of flu vaccinations locally, particularly amongst at risk groups and frontline health and social care	The system ran a very successful flu vaccination programme with higher rates of uptake in all groups in all localities. This sat

	workers, and to support effective roll-out to the Year 7 primary school cohort and other additional cohorts that may be recommended. Efforts will be directed through regional and local flu groups and networks.	alongside the COVID-19 vaccination programme which also achieved high uptake.
8	All members support the ongoing local action following declaration of a climate change emergency.	All areas continued with strong organisational commitment to the delivery of published plans to address climate change, working with statutory, voluntary and commercial partners across local systems.

9. Work Programme Priorities 2021/22

9.1 Priorities agreed by Health Protection Committee members for 2021/22 were to:

1 Maintain response to COVID-19 and ensure preparedness and resilience to respond to future pandemics or health protection emergencies. As part of this, lead efforts to target vaccination inequalities

2 Recover screening and immunisation programme delivery, coverage and uptake

3 Embed and strengthen community infection management services to prevent and respond to infections throughout the community

4 Work to reduce the incidence of healthcare associated infections and to tackle antimicrobial resistance across our communities

5 Focus efforts to address health inequalities, in particular health protection pathways for migrant and homeless communities

6 Maintain a focus on local action to address the climate emergency.

10. Authors

Alastair Harlow, NHS Devon
Ami Butler, NHS Kernow
Dr Alison Mackenzie, NHS England and NHS Improvement
Lex Gainsbury, UK Health Security Agency
Neil Vine, NHSEI (emergency planning)
Julia Chisnell, Torbay Council, in association with all members of the Devon and Cornwall Health Protection Committee
With thanks to Duncan Webster, working with Torbay Council Public Health, for the screening and immunisation tables

11. Glossary

AMR	Antimicrobial resistance
CCG	Clinical Commissioning Group
E. coli	Escherichia Coli
HPV	Human papillomavirus testing (for risk of developing cervical cancer)
IPC	Infection Prevention and Control
MMR	Measles, Mumps and Rubella (immunisation)
MRSA	Methicillin resistant Staphylococcus aureus
MSSA	Methicillin sensitive Staphylococcus aureus
NEW Devon CCG	Northern, Eastern and Western Devon Clinical Commissioning Group
NHSEI	NHS England and NHS Improvement
NIPE	New-born Infant Physical Examination
PHE	Public Health England
PPE	Personal Protective Equipment
SCID	Severe Combined Immunodeficiency
UKHSA	UK Health Security Agency

Appendix 1 **Health Protection Committee terms of reference & affiliated groups**

Appendix 2 **Roles in relation to delivery, surveillance and assurance**

Appendix 3 **Immunisation performance 2020/21**

Appendix 4 **Screening performance 2020/21**

Appendix 1

Health Protection Committee
Summary terms of reference & affiliated groups

Membership of the Committee:

- Local Authority Public Health
- Public Health England (PHE), now UK Health Security Agency (UKHSA)
- NHS England & Improvement (NHSEI)
- NHS Devon and Cornwall Clinical Commissioning Groups (CCG).

Meetings of the Health Protection Committee are held quarterly.

A number of groups sit alongside the Health Protection Committee with remits for:

- Infection Prevention and Control
- Antimicrobial Stewardship
- Immunisation
- Screening
- Seasonal vaccination
- Emergency planning (including Local Resilience Forums)
- Migrant and Refugee health
- TB & Hepatitis.

All oversight groups have Terms of Reference and clear escalation routes to ensure accountability both within NHS England and Public Health England / UKHSA and into individual partner organisations.

NHSE, PHE / UKHSA and CCG provide quarterly performance, surveillance, and assurance reports to the Health Protection Committee.

The Local Authority lead officers review surveillance and performance monitoring information to identify health protection risks and/or under performance prior to committee meetings. Officers are responsible for liaising with relevant partners to ensure that actions have been agreed to mitigate against any identified risks, or to improve performance. The outcomes of these discussions are formally reported to the Health Protection Committee for consideration and agreement.

Appendix 2

Definition of roles and arrangements in relation to delivery, surveillance and assurance

Prevention and control of infectious disease

Normal working arrangements are described in the paragraphs below. During the pandemic there has been an enhanced response to infectious disease, with additional responsibilities taken on by Local Authority Public Health teams in relation to COVID-19 tracing, isolation and containment, funded in part through the national Contain and Outbreak Management Fund.

Public Health England (now UKHSA) health protection teams lead the epidemiological investigation and the specialist health protection response to public health outbreaks or incidents. They have responsibility for declaring a health protection incident, major or otherwise and are supported by local, regional and national expertise.

NHS England / Improvement is responsible for managing and overseeing the NHS response to any incident that threatens the public's health. They are also responsible for ensuring that their contracted providers deliver an appropriate clinical response.

Clinical Commissioning Groups ensure, through contractual arrangements with provider organisations, that healthcare resources are made available to respond to health protection incidents or outbreaks.

Local Authorities, through the Director of Public Health or their designate, has overall responsibility for strategic oversight of an incident or outbreak which has an impact on their population's health. They should ensure that an appropriate response is put in place by NHSE/I and UKHSA, supported by the local Clinical Commissioning Group. In addition they must be assured that the local health protection system response is robust and that risks have been identified, are mitigated against, and adequately controlled.

Public Health England / UKHSA provides a quarterly report to the Committee containing epidemiological information on cases and outbreaks of communicable diseases of public health importance at local authority level.

Surveillance information on influenza and influenza-like illness and infectious intestinal disease activity, including norovirus, are published during the Winter months. These bulletins report information for the Public Health England Centre geography (Devon, Cornwall and the Isles of Scilly, and Somerset). Public Health England also provides a list of all community outbreaks all year round.

The Devon Health Protection Advisory Group, led by Public Health England and convened quarterly, provides a forum for stakeholders, including hospital microbiologists, environmental health officers, consultants in public health, water companies and infection control nurses, to share intelligence and any risks identified in local arrangements to manage communicable disease incidence.

Screening and Immunisation

Population Screening and Immunisation programmes are commissioned by NHS England and Improvement under what is known as the Section 7A agreement. There are 20 population immunisation programmes and 11 population screening programmes. These programmes cover the whole life course from antenatal to elderly persons and, in any one year, approximately 70% of the population will become eligible for at least one immunisation or screening test. These programmes are a core element of prevention and early diagnosis and offer opportunities for accessing populations to improve wider health and wellbeing.

NHS England is the lead commissioner for all immunisation and screening programmes except the six antenatal and new-born programmes that are part of the CCG Maternity Payment Pathway arrangements, although NHS England remains the accountable commissioner.

Public Health England has been responsible for setting national screening and immunisation policy and standards through expert groups (the National Screening Committee and Joint Committee on Vaccination and Immunisation). At a local level, specialist public health staff in Screening and Immunisation Teams, employed by NHSE/I, work alongside NHS England Public Health Commissioning colleagues to provide accountability for the commissioning of the programmes and system leadership.

Local Authorities, through the Director of Public Health, are responsible for seeking assurance that screening and immunisation services are operating safely whilst maximising coverage and uptake within their local populations. Public Health Teams are responsible for protecting and improving the health of their local population under the leadership of the Director of Public Health, including supporting NHSE/I in efforts to improve programme coverage and uptake.

The South West Screening and Immunisation Team provides quarterly reports to the Health Protection Committee for each of the national screening and immunisation programmes. Reports are considered by lead Local Authority Consultants in Public Health and any risks identified are considered with NHSE/I specialists to agree mitigating activities.

Serious incidents that occur in the delivery of programmes are reported to the Director of Public Health for the Local Authority and to the Health Protection Committee.

Locality Immunisation Group activity was suspended during the pandemic but is being re-introduced from 2022.

Separate planning and oversight groups are in place for seasonal influenza.

There are oversight groups (Programme Boards) for all screening programmes and these form part of the local assurance mechanisms to identify risks and oversee continuous quality improvement. In addition, specific project groups are convened, as necessary, to oversee significant developments in the programmes and the introduction of new programmes.

All the oversight groups have Terms of Reference and clear escalation routes to ensure accountability both within NHS England and Improvement and into individual partners.

Healthcare associated infections

NHS England and NHS Improvement sets out and monitors the NHS Outcomes Framework which includes Domain Five (safety): treating and caring for people in a safe environment and protecting them from avoidable harm. The Area Locality Teams of NHS England and NHS Improvement hold

local Clinical Commissioning Groups to account for performance against indicators under this domain, which includes incidence of healthcare associated methicillin-resistant Staphylococcus aureus (MRSA) bacteraemia and incidence of Clostridium difficile infection (CDI).

Public Health England, through its consultants in communicable disease control, leads the epidemiological investigation and the specialist health protection response to wider community non-hospital outbreaks, and is responsible for declaring a health protection incident.

The Clinical Commissioning Group's role is to ensure, through contractual arrangements with provider organisations, that health care associated infection standard operating procedures are in all provider contracts and are monitored regularly. NHS Devon Clinical Commissioning Group deploys this role through the Nursing and Quality portfolio. In addition, Clinical Commissioning Groups must be assured that the Infection Prevention and Control Teams covering the hospital and NHS community healthcare provided services sector are robust enough to respond appropriately to protect the local population's health, and that risks of health care associated infection have been identified, are mitigated against, and are adequately controlled.

The Local Authority, through the Director of Public Health or their designate, has overall responsibility for the strategic oversight of a health care associated infection incident affecting their population's health. They should ensure that an appropriate response is put in place by NHS England and NHS Improvement and Public Health England, supported by the Clinical Commissioning Group.

The Devon Infection Prevention & Control (IPC) Forum is a forum for all stakeholders working towards the elimination of avoidable health care associated infections (HCAI) for the population of Devon, including the Unitary Authorities of Plymouth and Torbay. The group covers health and social care interventions in clinical, home and residential care environments, identifying risks, sharing best practice and collaborating in system-wide approaches. The group is co-ordinated by NHS Devon Clinical Commissioning Group and is a cross-agency forum involving Acute and Community NHS Trusts, Ambulance and Out of Hours Doctors, Local Authority Public Health, Public Health England, Medicines Optimisation and NHS England and NHS Improvement. The Group meets quarterly with more frequent sub-groups as required.

In Cornwall there is a Directors of Infection Control Group with multi-agency attendance working on a similar agenda, also reporting into the Health Protection Committee. There is cross-attendance between the Devon and Cornwall groups.

Emergency planning and response

Local resilience forums (LRFs) are multi-agency partnerships made up of representatives from local public services, including the emergency services, local authorities, the NHS, the Environment Agency, and others. These agencies are known as Category 1 Responders, as defined by the Civil Contingencies Act. The geographical area the forums cover is based on police areas (Devon, Cornwall and the Isles of Scilly).

The LRFs aim to plan and prepare for localised incidents and catastrophic emergencies. They work to identify potential risks and produce emergency plans to either prevent or mitigate the impact of any incident on their local communities.

The Local Health Resilience Partnership (LHRP) is a strategic forum for organisations in the local health sector. The LHRP facilitates health sector preparedness and planning for emergencies at Local Resilience Forum (LRF) level. It supports the NHS, Public Health England (PHE) and local authority (LA) representatives on the LRF in their role to represent health sector Emergency Planning, Resilience and Response (EPRR) matters.

All Councils continue to engage with the Local Resilience Forum and the Local Health Resilience Partnership in undertaking their local engagement, joint working, annual exercise programme, responding to incidents and undertaking learning as required.

Overview of alcohol in those under 18 years of age in Devon

Risk taking behaviour among young people is declining at a population level. Teenagers are less likely to smoke, drink and take drugs. However, alcohol consumption in younger people in the UK continues to be higher than the European average. Underage drinking poses a range of risks and negative consequences. These include injuries, impairs judgement, increases risk of physical and sexual assault, increases risk of alcohol problems later in life, death, interferes with brain development, increased risk of using other substances and antisocial activities. Young people may drink as a way of asserting independence, peer pressure, stress and/or home life environment. Often, they do not fully recognise the impact on health and behaviours.

The purpose of this overview is to provide an overview of the available data on alcohol use and harm among those under 18 years of age in Devon.

Risk factors

There may be many different reasons which influence underage drinking, and these can include:

- Genetics
- Biological markers
- Childhood behaviour
- Psychiatric disorders
- Psychosocial disorders
    - Family dynamics
    - Positive expectancies
    - Childhood trauma
    - Alcohol advertising and pricing
- Emotional and behavioural problems

Some of the risk factors above may also be influenced by wider determinants of health and therefore they can be described as a symptom of a wider issue rather than the cause of underage drinking. Influencing some of these risk factors may help to prevent some of the risk factors associated with underage drinking.

Public Health Devon

Devon County Council

Prevalence

According to the Smoking, Drinking and Drug survey amongst young people in England 2018, around **44%** of children aged 11 to 15 years reported they had ever had an alcohol drink. This proportion has continued to reduce over the past two decades. When expressed by age, there is a clear relationship with age and so as age increases, the likelihood of admission for alcohol specific conditions increase.

Hospital admissions

Alcohol specific admissions are defined as any admission in persons under 18 years of age where the primary or secondary diagnosis are an alcohol-specific (wholly attributable) condition.

On average each year there are around **80** alcohol specific admissions among those aged 18 years and younger in Devon. Higher counts tend to be among those aged 15 to 19 years, followed by 10 to 14 years.

Trends

Trends over the past decade show little change in rates. Recent data shows that Devon has a rate of **52.2 per 100,000**, a rate significantly higher compared to the England average (**29.3 per 100,000**).

Interesting when observing rates nationally, many local authorities in the London region tend to have significantly lower rates compared to the England average. Please note that lower rates in the London region may skew the overall England rate.

Exploratory analyses carried out by Public Health England in 2019 for emergency admission rates identified a similar finding for self-harm admissions. The potential hypothesis for this difference at the time was around how services may be configured in London. Given that just over a third of alcohol specific admission in this data would also be classified as self-harm, a similar hypothesis could explain some of the higher rates of alcohol admissions for under 18 years in the Southwest region.

In addition, it was suggested that higher admissions rates may also be an indicator of better care, stricter adherence to NICE guidance, better health-seeking attitudes and/or engagement with health services, or a combination of two or more of these factors.

Deprivation

There is an association between deprivation and under 18 alcohol specific admissions. As levels of deprivation increase, the likelihood of admission increases. Moreover, higher rates are observed from the most deprived areas of Devon compared to the least deprived areas.

Maria Moloney-Lucey, 2022
Public Health Intelligence Specialist
Devon Public Health

Public Health Devon

Devon County Council

Variation

Analysis by lower super output area (LSOA) show that there are areas in Devon which have almost a 13-fold difference in terms of rates. Heavitree Fore Street area has a rate of **218.1** per 100,000 compared North-East of Exeter Broadclyst (South), Politmore, Dog Village and surrounding areas with a rate of **17.6** per 100,000. Higher rates in the Heavitree area may also be indicative of the fact that it is an area with higher student accommodation. Please note that at smaller geographical levels, counts are small and can vary significantly each year.

Primary diagnosis

Recent data show that on average over a third of under 18 alcohol admissions present with a primary diagnosis of 4-Aminophenol derivatives (such as paracetamol) or Benzodiazepines with secondary diagnosis of alcohol specific conditions. This combination of conditions is also classified as self-harm which perhaps could indicate a degree of complexity associated with certain individuals admitted rather than just an acute illness due to over consumption of alcohol.

Treatment

About Y-SMART

Y-SMART is currently funded by multiple stakeholders (Public Health, Childrens Services (both Devon County Council), Youth Offending Team, Office of Police and Crime Commissioner.

Y-SMART provides support to children and young people aged up to 18 years (or up to age 24 years if known to the care system) who wish to address their alcohol or other drug use. In addition, Y-SMART also provides support to children and young people affected by parental substance misuse (Y-Project). This aspect of the contract is funded by the Office of Police and Crime Commissioner.

Y-SMART is part of Children Services and helps inform the Personal Social Health and Economic (PSHE) education offer available to mainstream schools and promotes the use of Public Health England's educational toolkits for drugs and alcohol. Y-SMART deliver targeted educational interventions to specialist education settings. There are currently 17.26 whole time equivalents (wte) employed across Devon supporting the service delivery (13.76 wte with a caseload).

Referral routes

There are a range of referring partners with individuals also being able to self-refer to Y-SMART. For 2020/21 this includes:

- Mainstream education (23%)
- Children and family services (14%)
- Youth offending (11%)
- Self-referral (7%)
- Hospital setting (1%)
- Unknown referral route (44%)

Maria Moloney-Lucey, 2022
Public Health Intelligence Specialist
Devon Public Health

Referral types

Most of the referrals seek support around alcohol or cannabis use. However, many service users (**79%**) often report using more than one substance[1].

Needs and outcomes

In 2020/21, **98%** of service users accessing Tier 3 treatment completed their goals demonstrating the effectiveness of the support provided.

70% of service users engaged in self-harm demonstrating the need to increase resilience in children and young people and improve the access to mental and sexual health support within the Y-SMART offer.

Latest data available for 2020/21 indicate that Devon has higher rates compared to England for children and young people accessing substance misuse treatment with a co-existing mental health need[2].

62% of those identified as having a co-existing mental health need are receiving treatment for their mental health in Devon compared to **67%** in England. This indicates that almost a third of young people in Devon with a mental health need are not being treated. Further work may be required to understand the reasons behind this.

In terms of housing status, across Devon there is a higher proportion of children living in care accessing treatment compared to England (**10% and 7% respectively**). This could suggest that the Y-SMART service is effective and attractive in supporting children living in care into treatment. Whilst also potentially indicating that children in care have an increased risk of substance misuse.

The level of vulnerability in the Devon youth substance misuse treatment population is also a concern with worsening trends in a number of areas including self-harm, sexual exploitation, and children affected by domestic abuse.

Gaps/Opportunities

Scotland and Wales have introduced minimum unit pricing to tackle the harms caused by high strength low-cost alcohol products (white cider in particular). At present there does not appear to be government support to introduce minimum unit pricing in England. The governments Harm to Hope Drug Strategy focuses predominantly on addressing the harms caused by drugs though some of the Supplementary Substance Misuse Treatment Grant (SSMTG) which can be used to address harms caused by alcohol.

The SSMTG provides us with an opportunity to improve the integration of services and to establish and develop pathways between key parts of the system. The newly formed Local Partnership set up to inform how the grant funding is to be

allocated wish to increase investment in children and young people's service and in improving the pathway between hospital and the community service.

There is currently a review of the PSHE offer being undertaken by the Public Health Team and over the next 3 years it is anticipated that the SSMTG provides opportunities to improve the integration of substance misuse and mental health treatment offers.

Nationally the indication is that parents, friends, or family are the main source of providing alcohol consumed by children and young people who end up being admitted to hospital[3].

Summary

- Around 44% of children and young people aged 11 to 17 years have ever had an alcoholic drink. A reducing trend over the last two decades.
- Alcohol specific admissions in those under 18 years continues to be significantly higher compared to the England average and has not vastly changed over the past decade.
- In some areas across Devon there is a 13-fold difference in alcohol admission rates.
- Alcohol admissions increase as deprivation increases.
- Just over a third of admissions present with a primary diagnosis of 4-Aminophenol derivatives (such as paracetamol) or Benzodiazepines indicating that some admissions may be more complex.
- 271 children and young people accessing treatment (Tiers 2 and 3 in 2020/21).
- Many service users have co-existing mental health needs of which around a third are not currently being treated.
- There may be an increased risk of substance misuse among those that are vulnerable such as children in care and those affected by self-harm, sexual exploitation, and domestic abuse.
