

PENSION FUND RISK REGISTER

Report of the County Treasurer

Please note that the following recommendations are subject to consideration and determination by the Board before taking effect.

Recommendation: That the Board notes the Pension Fund Risk Register and the additional actions proposed to mitigate risk.

1. Introduction

- 1.1. Effective risk management is an essential part of any governance framework as it identifies risks and the actions required to mitigate their potential impact. For a pension fund, those risks will come from a range of sources including the funding position, investment performance, membership changes, benefits administration, costs, communications and financial systems. Good information is important to help ensure the complete and effective identification of significant risks and the ability to monitor those risks. The risks that have been identified are incorporated into the Fund's Risk Register.
- 1.2. The Pension Board monitors the Risk Register as part of its scrutiny role in relation to risk and compliance, and will raise any specific concerns to the Investment and Pension Fund Committee, as necessary. The Board previously considered the Risk Register at its meeting on 11th February 2019.
- 1.3. The Risk Register is attached at Appendix 1 to this report. It highlights the key risks in relation to the Pension Fund, the current processes in place to mitigate the risk, and the planned improvements in place to provide further assurance. This incorporates the risk register of both the Investments Team and Peninsula Pensions.
- 1.4. The Investment and Pension Fund Committee is the ultimate risk owner for the Pension Fund and the Risk Register is presented to the Committee on an annual basis.

2. Assessment of Risk

- 2.1. Risks are assessed in terms of the potential impact of the risk event should it occur, and in terms of the likelihood of it occurring. These are then combined to produce an overall risk score. Each risk is scored assuming no mitigation, and then on the basis of the mitigation in place.
- 2.2. In addition to the current mitigation in place, further actions are planned to provide a greater level of assurance, and these are detailed together with the planned timescale for the action to take place. The level of risk will be reviewed once these additional actions have been implemented.
- 2.3. Further risks are likely to arise from future decisions taken by the Investment and Pension Fund Committee, and from changes in legislation and regulations. Where such new risks arise, they will be added to the risk register, assessed, and mitigation actions identified.

3. Revisions to the Risk Register

- 3.1. The Risk Register is reviewed and updated on an ongoing basis during the year. There have however been no further amendments since the previous Pension Board meeting.
- 3.2. Taking account of the revisions above there are now 43 risks recorded in the Risk Register. The following table summarises the number of risks assigned to low, medium and high-risk scores, before and after mitigation.

Risk Category	Number of Inherent Risks Identified	Number of Risks following mitigating action
High	10	2
Medium	23	7
Low	10	34

- 3.3. Action taken to mitigate risks has reduced the number of high risks from 10 to 2. The remaining high risk is in respect of a market crash leading to a failure to reduce the deficit.

4. Conclusion

- 4.1. The Board are asked to note the Pension Fund Risk Register, and the additional actions proposed to mitigate risk.
