Co Cars across the South West

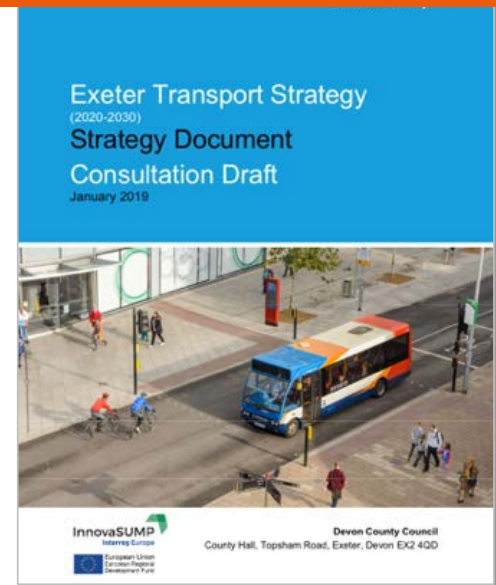

Liveable Exeter

**“Greater Connectivity
Greater Places for
People
Greater Innovation”**

“People, place, prosperity”

Place economics

Improved air quality

Congestion & pollution

Productive workplaces

liveable spaces

Private cars & the

Place economics

- Create a more attractive environment to live, work & play
- Shift to experience, not things – but in a social ‘valued’ enterprise way
- Cheaper to share than to own for both people & cities

Co Cars | Co Bikes | Co Delivery

But don't just take our word for it...

“Co Cars will really benefit our staff by allowing them to work more flexibly & travel more sustainably to meetings & on other essential journeys...
.....helping us to reduce costs, the number of cars on the road in Exeter and on our campuses.”

Joel Smith, Sustainability Officer, University of Exeter

Our operations

Complete

- All bikes & station infrastructure received from European supplier
- Majority of tech issues resolved
- Operations Director in post to manage rollout, customer service and tech support
- Daily bike and station checks in place

In process

- Customer service moving in-house to ensure same quality as Co Cars
- 'Quick start' guide to be sent to all new members on registration
- Vinyl update on bikes and stations with new customer service details and frame lock messaging
- Development of corporate membership offer(s)

“I teach at Exeter College and occasionally at St Luke's campus, and Co Bikes are literally the only way I can get from one place to another quickly enough to start my class on time. I'm really excited about the roll out of more docking stations, and the new upgraded bikes are great!”

Tim, Spanish Programme Leader, Exeter College

Co Cars | Co Bikes | Co Delivery

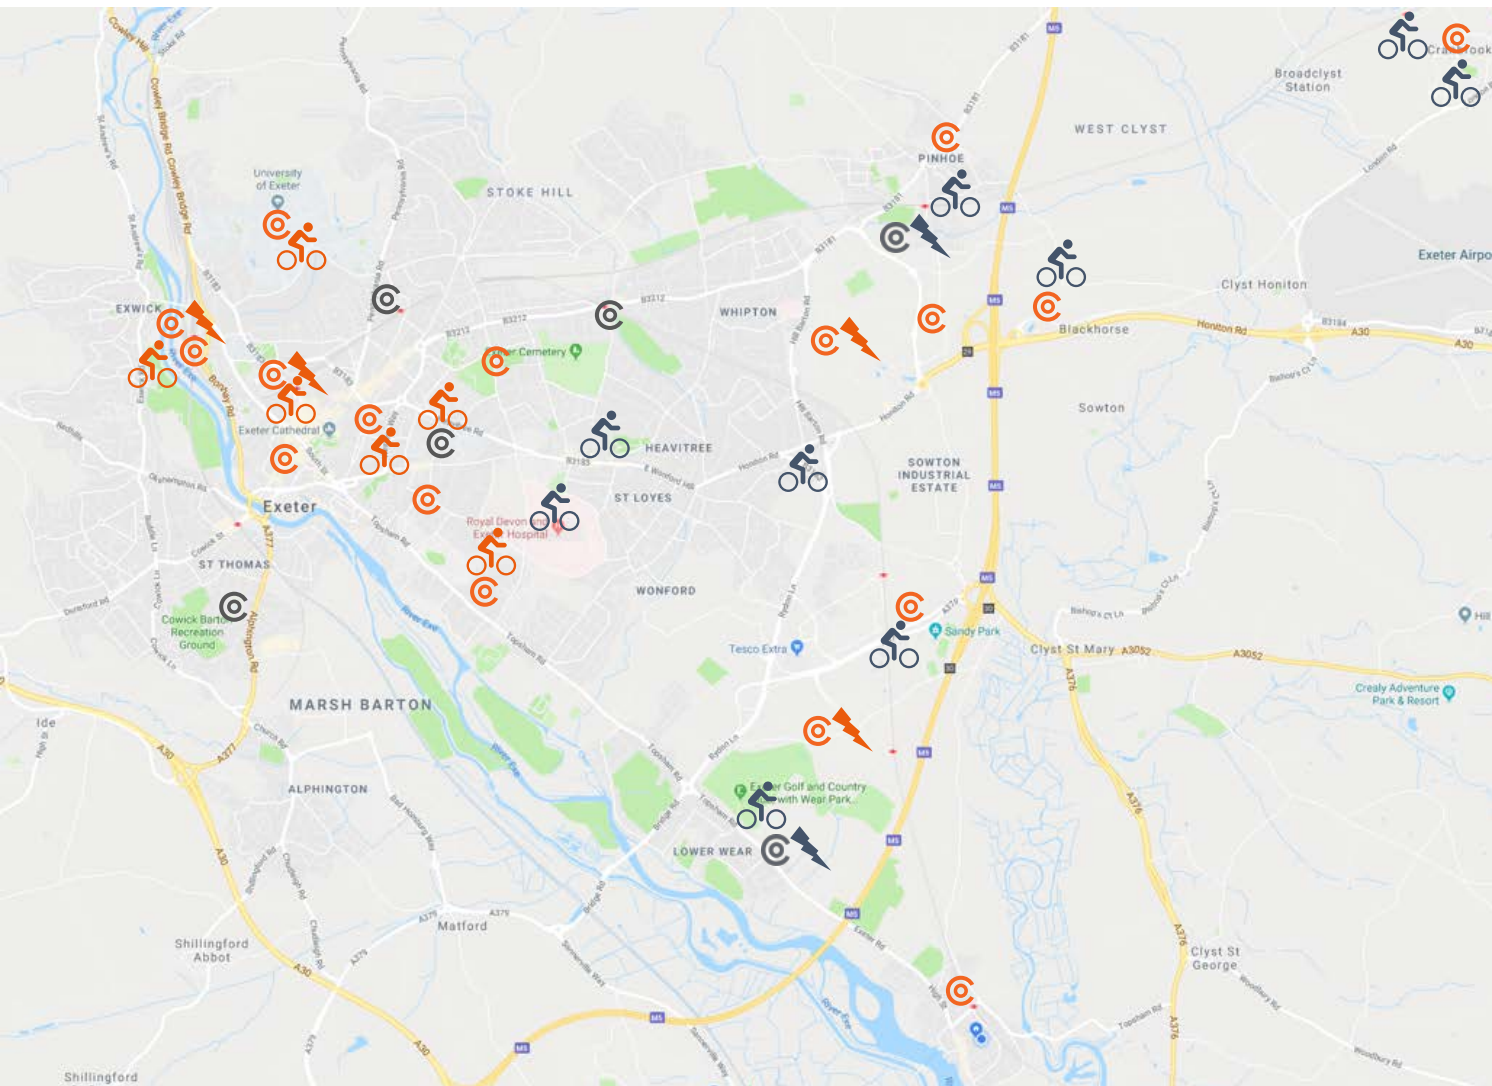

“As the commercial manager of Exeter City Council my role involves working across the city and wider a field including Topsham. Using Co Bikes assisted cycling allows me to cycle between all my meetings without the need for special clothing, in fact I always wear a suit. I would certainly recommend assisted cycling as it is faster, cleaner and great for the environment with the added bonus of getting me fitter.”
David, Commercial Manager, Exeter City Council
