Introduction

Our development priorities

Our aim is to continue to provide excellent independent, objective assurance and consulting services designed to add value and protect public resources. We aim to assist in improving the efficiency and operations of our client organisations in line with corporate values of continuously challenging services and promoting openness, accountability and high standards of risk management, internal control and governance.

We aim to further develop our audit performance by the consistent use and pro-active development of Audit Management Software and other IT solutions where possible.

Our high level objectives are have been summarized into four characteristics: -

Process	People	Customer	Pounds £
Improving the management of our relationship with customers to ensure that audit services are developed and delivered appropriately	Using DCC HR policies to deliver results to support our customers strategic goals	Ensuring the customer is at the heart of what we do; listen and respond to the needs and priorities of our customers.	Delivery of a best value / Value For Money internal audit service
Organizing audit activities to deliver maximum value	Ensuring that all audit staff know what they need to do, and have the skills and competence to do it	Develop our approaches that meet individual customer needs, including those "hard to reach" and more disadvantaged clients and partners, whilst ensuring that a consistent and high-quality service is delivered.	Maintaining and increasing customer base and associated revenue for contracted services
Ensuring that each element of the audit process (planning, delivery and reporting) reflects best practice and operates in a "lean" way.	Develop management practices that support innovation, creativity and effectiveness.	Ensure suitable arrangements are in place that engage with the customer and seek and encourage feedback at all stages of our processes.	Promote the efficient use of financial resources in terms of identifying audit deliverables and aligning resources accordingly
Ensuring equality and diversity in service delivery	Have a wider pool of experts readily available to meet short term needs of our partners and clients	Aim to "add value" to the organisations we audit so that they receive more than just assurance	Manage and control expenditure and maximize income
Using our audit "tools" (staff and IT) in an innovative way to ensure we can deliver maximum coverage and input on every audit.			

Key Changes / challenges

The Partnership - The Partners have stated that they appreciate the high quality and effective internal audit service that the Partnership provides.

The contract with DAP was extended in April 2017 for a further 7 years. This longer contract life provides stability for the Partnership and increases the ability to bid for new work with other appropriate clients and partners.

Process – We comply with the Public Sector Internal Audit Standards as revised in 2017; the Standards closely follow the Institute of Internal Audit Standards. We complete an annual assessment of how we meet both the PSIAS and the LGAN (Local Government Application Note CIPFA 2014) and capture any required improvements within this development plan to meet the PSIAS.

We constantly review the effectiveness of our ICT; we work with our ICT provider (Devon ICT via SCOMIS) to determine how we may be able to further develop our ICT and help maximize efficiency gains.

Outputs – we appreciate that senior management and audit committee members have significant calls upon their time; we have made significant changes to the way our reports are presented, with the aim of reducing text but maximizing the impact of the messages we wish to convey. We make greater use of graphics where appropriate, with the old maxim of “a picture paints a thousand words”. We know our reports are our “product” and we will train and develop staff to ensure our reports are the best they can be.

Added value – we know that our clients expect us to provide more than just assurance; they look to us to add value to their organisations. This is often through well-formed and business leading recommendations, or can simply be spreading best practice to common solutions. Our team look to work “across organisations” to (where appropriate) share understanding of common problems and effective solutions.

Customers - In June 2019 we were re-accredited with the Customer Service Excellence award. Our assessor, June Shurmer confirmed that we continue to meet this standard. We continue to develop our processes and arrangements to ensure our customers receive a high quality, customer focused service. Our focus this year will be on the ‘Customer Journey’ mapping the delivery and customer perceptions.

People – we wish to ensure that we have all the elements of an excellent employer. As a management team we need to identify areas where we need to strengthen / improve our practices to ensure we get the best possible return from our most valuable resource; our employees. Any areas for improvement will be captured in this development plan.

Pounds – We have faced considerable financial challenges over the years. We have achieved these financial targets and still provide a respected and professional service. We continue to closely manage all our finances to ensure we stay within our resource envelope.

Using this document

This document is expected to be a “live” document – i.e. actions identified will be taking place at all times during the year.

At certain points it is appropriate to monitor what has been achieved, and what is still outstanding, and “capture” where we currently are with our development aims.
