

Health and Wellbeing Outcomes Report

Report of the Director of Public Health

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper and accompanying presentation introduces the updated outcomes report for the Devon Health and Wellbeing Board.

2. Summary of the Health and Wellbeing Outcomes Report, July 2022

2.1 The full Health and Wellbeing Outcomes Report for **July 2022**, along with this paper, is available on the Devon Health and Wellbeing website: <https://www.devonhealthandwellbeing.org.uk/jsna/health-and-wellbeing-outcomes-report/> -- The report monitors the four Joint Health and Wellbeing Strategy 2020-25 priorities, and includes breakdowns by local authority, district, and trends over time. These priorities areas include:

- **Create opportunities for all**
- **Healthy safe, strong and sustainable communities**
- **Focus on mental health**
- **Maintain good health for all**

Seven(?) indicators have been updated with new data and are as follows:

- **% with NVQ4+ (aged 16-64), 2021**

The percentage of people aged 16-64 with an NVQ4+ qualification in Devon is 37.5%, a decrease (worse) of 3.2 percentage points from the previous year. This remains significantly lower (worse) compared to the England average of 42.5%. Most districts are significantly lower (worse) compared to the England average, with the lowest being Torridge at 21.8%. Exeter is the only district significantly higher (better) at 47.4%.

- **% with No Qualifications (NVQ) (aged 16-64), 2021**

The percentage of people aged 16-64 with no qualifications in Devon is 5.4%, an increase (worse) of 1.7 percentage points from the previous year. This remains significantly lower (better) compared to the England average of 6.3%. There is variation across the Devon districts, with Teignbridge (8.3%) and Torridge (8.6%) being significant higher (worse) compared to the England average.

- **Adults Excess Weight, 2020/21**

The percentage of adults classified as overweight or obese in Devon is 62.0%, an increase (worse) of 2.7 percentage points from the previous year. This is similar

compared to the England average of 63.5%. Most Devon districts are similar compared to the England average; no districts are significantly higher (worse); South Hams is the only district significantly lower (better) at 50.8%.

- **Key Stage 4 Performance, 2020/21**

The percentage of pupils achieving grades 5 or above (in English and Mathematics GCSEs) in Devon is 50.9%, an increase (better) of 2.2 percentage points from the previous year. This is similar compared to the England average of 51.9%. There is variation across the Devon districts, with North Devon (46.6%), Teignbridge (44.6%), Torridge (42.4%), and West Devon (47.0%) all significantly lower (worse) compared to the England average.

- **Proportion of Physically Active Adults, 2019/20**

The percentage of adults achieving at least 150 minutes of physical activity per week in accordance with UK CMO recommended guidelines on physical activity in Devon is 74.1%, a decrease (worse) of 2.3 percentage points from the previous year. This remains significantly higher compared to the England average of 65.9%. Most Devon districts are significantly higher (better) compared to the England average; no districts are significantly lower (worse); East Devon (69.1%) and Mid Devon (66.7%) are statistically similar

- **Rough Sleeping, 2020**

In Devon, the rate of rough sleepers counted or estimated by the local authority is 0.6 per 10,000 population. This is similar compared to the England average of 0.4 per 10,000. Most districts are statistically similar compared to the England average; Exeter is the only district significantly lower (worse) at 1.1 per 10,000; South Hams is the only district significantly higher (better) at 0.0 per 10,000.

- **Under 18s Conception Rate, 2020**

The under 18s conception rate in Devon is 9.9 per 1,000 population, a decrease (better) of 1.8 per 1,000 from the previous year. This remains significantly lower (better) than the England rate of 19.0 per 1,000. Most Devon districts are similar compared to the England average; no districts are significantly higher (worse); Teignbridge is the only district significantly lower (better) at 7.2 per 1,000.

Please note that many outcome indicators demonstrate health and wellbeing inequalities across smaller areas which may not always be apparent when observing only the Devon figure.

Please refer to the Devon Health and Wellbeing Outcomes report for a full list of indicators.

3. Future developments to the Devon Health and Wellbeing Outcomes Report

3.1 The 'Explanatory' Headline resource was published online in December and has recently been revamped and updated in May. This can be used to compliment the outcomes report as it provides information at many different geographical levels.

3.2 The 'Exploratory' resource is still in development with delays caused due to the Coronavirus global pandemic. This tool will provide information on health and wellbeing across the life course focusing on geographic variation, trends, deprivation inequalities and correlations.

3.3 An interactive tool is in development for the Outcomes Report and will

3.4 An easy read version of the Devon Health and Wellbeing Outcomes report is also in development, with delays caused due to the Coronavirus global pandemic.

4. Legal Considerations

There are no specific legal considerations identified at this stage.

5. Risk Management Considerations

Not applicable.

6. Options/Alternatives

Not applicable.

7. Public Health Impact

The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcome indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.
