

Health and Wellbeing Outcomes Report

Report of the Chief Officer for Communities, Public Health, Environment and Prosperity

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper introduces the updated outcomes report for the Devon Health and Wellbeing Board, which monitors the priorities identified in the Joint Health and Wellbeing Strategy for Devon 2016-2019.

2. Summary of the Health and Wellbeing Outcomes Report, March 2017

2.1 An 'updates only' version of the Health and Wellbeing Outcomes Report for March 2017 is included separately. The report is themed around the five Joint Health and Wellbeing Strategy 2016-19 priorities, and includes breakdowns by local authority, district, clinical commissioning group, inequalities characteristics and trends over time. Eight indicators have been updated with new data since the December 2016 report:

- **GCSE Attainment, 2015-16** – GCSE attainment levels are slightly above regional and national averages in Devon, but notable differences are evident by sex, area and social characteristics.
- **Alcohol-Related Admissions, 2015-16** – Admissions have fallen on 2014-15 levels and are significantly below the South West and England rates.
- **Healthy Life Expectancy (Male), 2013 to 2015** – Male healthy life expectancy at 65.3 years is above the national average and on a par with South West and comparator group levels.
- **Healthy Life Expectancy (Female), 2013 to 2015** – Female healthy life expectancy at 66.5 years is significantly above the England average.
- **Re-offending Rate, 2014** – Levels of reoffending in Devon (22.7%) are below South West, local authority comparator group and England levels, and have decreased over recent years.
- **Rough Sleeping Rate, 2016** – The rough sleeping rate in Devon is above local authority comparator group and England levels. Levels in Exeter are amongst the highest in England.
- **Emotional Wellbeing of Looked After Children, 2015-16** – Emotional wellbeing in looked after children in Devon is worse than South West, comparator group and England levels.
- **Self-reported Wellbeing (low happiness score), 2015-16** – Whilst the proportion in Devon with a low happiness score is below regional and national levels, the difference is not statistically significant.

3.2 The full detail for these indicators is included in the separate report. The following tables in this paper provide a quick summary of overall findings:

- Table 1 provides a summary of the indicators, the latest available rate, an indication of trend and a quick comparison between Devon, the South West and England.
- Table 2 gives a short textual summary covering the five priority areas.
- Table 3 compares the indicators with Devon's local authority comparator group, a group of similar local authorities, and is ordered according to Devon's ranking. The darker purple shading shows the position of Devon in the local authority comparator (1 is best and 16 is worst) and the lighter purple shading shows Devon's ranking when the report was introduced in December 2016.

Table 4: Priority Area Summaries, March 2017

Priority	Summary
1. Children, Young People & Families	Teenage conception rates are falling and levels of development at school entry are improving. Variations in excess weight, poverty, GCSE attainment and alcohol harm persist.
2. Living Well	Smoking rates and deaths from preventable causes are falling, and levels of excess weight, physically activity and fruit and vegetable consumption compare favourably with similar areas.
3. Good Health and Wellbeing in Older Age	Deaths at home, healthy life expectancy, falls and GP support compare well in Devon. However, whilst the service is effective, the coverage of re-ablement services is lower.
4. Strong and Supportive Communities	Housing-related measures, including fuel poverty, dwelling hazards and rough sleeping levels are a cause of concern in Devon.
5. Life Long Mental Health	Whilst general wellbeing is better, poorer outcomes are evident for those with mental health problems, including suicide rates, self-harm, and the mental wellbeing of local service users.

6. Public Health Impact

The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcomes indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.
