

HEALTH AND WELLBEING OUTCOMES REPORT 2016-19

DECEMBER 2017

DEVON HEALTH AND WELLBEING BOARD

UPDATES ONLY VERSION

The second Devon Joint Health and Wellbeing Strategy covering the years 2016 to 2019 has five priority areas and the selected indicators in this report align to these. The five priority areas are:

- 1. Starting Well** – We want all children in Devon to have the best start in life, and grow up happy, healthy & safe in loving and supportive families.
- 2. Living Well** – We want people in Devon to live healthy lives by taking responsibility for their own health and wellbeing.
- 3. Ageing Well** – We want adults to develop and maintain health and independence as long as possible so they can live life to the full.
- 4. Strong and Supportive Communities** – We want people to thrive in supportive communities with people motivated to help one another.
- 5. Lifelong Mental Health** – We want to ensure positive attitudes to mental health are fostered and prevention and early intervention supports lifelong mental health.

Joint Health and Wellbeing Strategy indicators are grouped on the next page around these five priorities. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each detailed individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon's position relative to the national family of peer authorities.

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups, localities and sub localities.

Trend and Future Trajectory – showing change over time for the selected indicator compared to the South West and England.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Compiled by the Devon County Council Public Health Intelligence Team

Report last updated: 1 December 2017

	R	Estimated Dementia Diagnosis Rate (65+)	60.6%	-	

* updated indicators

Summary

- 1. Children, Young People and Families** - Teenage conception rates are falling and levels of development at school entry are improving. Variations in excess weight, poverty, GCSE attainment and alcohol harm persist.
- 2. Living Well** - Smoking rates and deaths from preventable causes are falling, and levels of excess weight, physical activity and fruit and vegetable consumption compare favourably with similar areas.
- 3. Good Health and Wellbeing in Older Age** - Deaths at home, healthy life expectancy, falls and GP support compare well in Devon. However, whilst the service is effective, the coverage of re-ablement services is lower.
- 4. Strong and Supportive Communities** - Housing-related measures, including fuel poverty, dwelling hazards and rough sleeping levels are a cause of concern in Devon.
- 5. Life Long Mental Health** - Whilst general wellbeing is better, poorer outcomes are evident for those with mental health problems, including suicide rates, self-harm, and the mental wellbeing of local service users.

RAG Ratings

Red	R	Major cause for concern in Devon, benchmarking poor and/or trend sharply worsening
Amber	A	Possible cause for concern in Devon, benchmarking average and/or trend not improving
Green	G	No major cause for concern in Devon, benchmarking good and/or trend improving

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: Children, Young People and Families

Indicator: Excess Weight in Four / Five Year Olds

Period: 2016-17 (School Year) *UPDATED INDICATOR*

RAG Rating	
	Green
A	Amber
	Red

Overview
This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 22.8% of pupils in Devon were recorded in the excess weight category, compared to 23.1% for the South West, 22.8% for the local authority comparator group, and 22.6% for England. Within Devon no areas were significantly different to the national rate.

Equalities
Levels of excess weight are higher in more deprived areas. Levels of excess weight were also higher in boys than girls. No significant differences were observed by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 1: Children, Young People and Families

Indicator: Excess Weight in Four / Five Year Olds

Period: 2016-17 (School Year)

Description	Proportion of children aged 4-5 (reception year) classified as overweight or very overweight.
Source	NHS Digital and Devon Public Health Intelligence Team
Update Frequency	Annually, four months after end of school year (2017-18 due November 2018).
Outcomes Framework	Public Health Outcomes Framework Indicator 2.06i
Detailed Specification	Number of children in Reception (aged 4-5 years) classified as overweight or very overweight in the academic year as percentage of all children with height and weight recorded. Children are classified as overweight (including very overweight) if their BMI is on or above the 85th centile of the British 1990 growth reference (UK90) according to age and sex. Results obtained from National Child Measurement Programme (NCMP) covering children attending participating state maintained schools in England.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours for 2015. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates are not currently available at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares areas nationally based on area deprivation. National deprivation quintiles from the 2015 Indices of Deprivation (Index of Multiple Deprivation) used.

Indicator: Excess Weight in 10 / 11 Year Olds

Period: 2016-17 (School Year) ***UPDATED INDICATOR***

RAG Rating	
	Green
A	Amber
	Red

Overview
This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 29.3% of pupils in Devon were recorded in the excess weight category, which was below the South West (30.0%), local authority comparator group (31.4%), and England (34.3%) rates. The rates in the East Devon, Exeter, North Devon, the South Hams, Teignbridge and West Devon were significantly below the national rate. Rates decreased on 2013-14 levels.

Equalities
Levels of excess weight are higher in more deprived areas. Levels of excess weight were also higher in boys than girls. No significant differences were observed by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: Children, Young People and Families

Indicator: Teenage Conception Rate

Period: Q2 2016 (rolling year) ***UPDATED INDICATOR***

RAG Rating

G	Green
	Amber
	Red

Overview

There were 194 conceptions in Devon between September 2015 and June 2016 for females aged under 18, with around half leading to a birth. The latest rate (16.3 per 1,000 females) was broadly in line with South West (16.1), local authority comparator group (17.5) and England (19.9) rates. Rates have fallen significantly over recent years.

Equalities

There is a very clear link between area deprivation and conception rates, with higher rates in the most deprived areas both locally and nationally, although rates have fallen more rapidly in the most deprived wards in recent years. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 30 per annum), with less than 10 under 16 births per year.

Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average over time.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Living Well

Indicator: Excess Weight in Adults

Period: 2015-16

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview
 In Devon in 2015-16, 61.6% of the adult population had a BMI in excess of 25 (overweight or obese). This was the same as the South West (61.6%) and similar to the local authority comparator group (61.5%), and England (61.3%) rates. Within Devon the lowest rates of excess weight were seen in Torridge (58.8%). Due to a change in data source, trend data is not currently available.

Equalities
 Local breakdowns are not available. Rates vary by age, with the lowest rates in younger age groups, and the highest rates for 45 to 64 year olds in males, and 65 to 74 year olds in females. Levels of excess weight are higher in males than females (67.8% vs 54.7% nationally), although levels of obesity are slightly higher in females (24.7% vs 25.7% nationally).

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 2: Living Well

Indicator: Excess Weight in Adults

Period: 2015-16

Description	Percentage of adults classified as overweight or obese.
Source	Active Lives Survey, Sport England
Update Frequency	Annually
Outcomes Framework	Public Health Outcomes Framework Indicator 2.12
Detailed Specification	Number of adults with a BMI classified as overweight (including obese), calculated from the adjusted height and weight variables. Adults are defined as overweight (including obese) if their body mass index (BMI) is greater than or equal to 25kg/m ² . Denominator is number of adults ages 18+ with valid height and weight recorded. Height and weight is self-reported but is adjusted by age and sex using Health Survey for England data to adjust for differences between self-reports and actual BMI. Prevalences are weighted to be representative of the whole population at each level of geography and have been age-standardised.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours for 2015. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates cannot currently be calculated at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Figures only available for 2015-16 so trend analysis not possible.
Chart Notes Inequalities	Rates cannot currently be calculated at a local level.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Living Well

Indicator: Proportion of Physically Active Adults

Period: 2015-16

UPDATED INDICATOR

RAG Rating	
G	Green
	Amber
	Red

Overview	69.9% of adults in Devon were physically active for at least 150 minutes per week in 2015-16. This is above the South West (68.6%), and comparator group (66.4%) and significantly above the national (64.9%) rates. The differences between the districts in Devon were not statistically significant. Due to a change in data source, trend data is not currently available.
-----------------	--

Equalities	Local breakdowns are not available. National results from the Active People survey highlight that physical activity rates are higher in less deprived areas and professional groups. Participation is also higher in males and younger age groups. There are no significant differences by ethnicity. Activity rates are significantly lower in people with limiting long-term health problems.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Living Well

Indicator: Diet - Fruit and Veg '5-a-day'

Period: 2015-16

RAG Rating

G	Green
	Amber
	Red

UPDATED INDICATOR

Overview
In Devon in 2015-16, 64.3% of the adult population consumed five or more portions of fruit and vegetables per day. This was significantly above the South West (61.0%), local authority comparator group (61.0%) and England (56.8%) rates. Within Devon the highest rates of were seen in North Devon (70.1%), and the lowest in Mid Devon (58.2%). Due to a change in data source, trend data is not currently available.

Equalities
Local breakdowns are not available. Fruit and vegetable consumption tends to be lower in areas with higher levels of deprivation. Women are more like to consume five or more portions of fruit and vegetables per day than men. The lowest levels of fruit and vegetable consumption are seen in younger adults.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Living Well

Indicator: Mortality Rate from preventable causes

Period: 2014-2016

RAG Rating

G	Green
	Amber
	Red

UPDATED INDICATOR

Overview
The mortality rate from causes considered preventable in Devon is 159.7 per 100,000, which is significantly below the South West (165.4), local authority comparator group (164.7) and England (183.0) rates. Within Devon rates were highest in North Devon (197.2) and lowest in the South Hams (127.3). The rate has fallen over time from 204.5 in 2001-03 to 159.7 in 2014-16, with the rate of decline slowing in recent years.

Equalities
Mortality rates from preventable causes tend to be higher in males than females. Preventable mortality rates are higher in more deprived areas across all age groups.

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Re-ablement Services (Effectiveness)

Period: 2016-17

RAG Rating

G	Green
	Amber
	Red

UPDATED INDICATOR

Overview

In 2016-17, reablement services were effective for 86.8% of older people who received the service in Devon, which was significantly higher than the South West (83.7%), local authority comparator group (83.0%) and England (82.4%) rates. The rate has decreased slightly from 89.8% in 2013-14. Within Devon the highest rates was seen in West Devon (96.7%).

Equalities

There is no clear pattern between the effectiveness of reablement services and deprivation levels in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Deaths in usual place of residence

Period: 2016

RAG Rating

G	Green
	Amber
	Red

UPDATED INDICATOR

Overview 54.9% of Devon residents who died during 2016 did so in their usual place of residence (home, care home or religious establishment). This was significantly above the South West (51.8%), local authority comparator group (48.9%) and England (45.8%) rates. Within Devon the highest rates were in West Devon (61.5%), and the lowest were in Exeter (50.2%). Rates have increased over time, rising from 52.3% in 2015 to 54.9% in 2016.

Equalities Rates of death in usual place of residence tend to be higher in less deprived areas, with the lowest rate seen in the most deprived areas of Devon (48.5%). Rates increase with age and higher rates are seen in females. Rates vary by condition, with the highest rates in people with Dementia and Alzheimers (79.6%), and the lowest for respiratory conditions (41.0%).

Priority 4: Strong and Supportive Communities

Indicator: Stable/Appropriate Accommodation (Learning Dis.)

Period: 2016-17

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

The nature of accommodation for people with learning disabilities has a strong impact on their safety and overall quality of life and the risk of social exclusion. In 2016-17 78.4% of adults with a learning disability in Devon (known to the council) were living in their own home or with their family, compared with 73.7% in the South West, 75.9% in the local authority comparator group and 76.2% nationally.

Equalities

A higher proportion of younger adults (18-30) with a learning disability are in stable and suitable accommodation in Devon, compared to 31-64 year olds.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 5: Life Long Mental Health

Indicator: Suicide Rate

Period: 2014-2016

RAG Rating

	Green
A	Amber
	Red

UPDATED INDICATOR

Overview
 Around 70 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.7 per 100,000. This was broadly similar to South West (11.0), local authority comparator group (10.7) and England (10.1) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen, rates in Devon have typically remained around or slightly above the national rate.

Equalities
 There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable for males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 5: Life Long Mental Health

Indicator: Social Contentedness

Period: 2016-17

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

44.0% of social care users surveyed in Devon in 2016-17 reported being satisfied with their social situation. This was below the England (45.4%) rate and significantly below the South West (46.1%) and local authority comparator group (47.2%) rates. Within Devon whilst there is some variation in responses at district level, smaller sample sizes mean the differences are not statistically significant.

Equalities

Female social care users in Devon reported being more satisfied with their social situation than male social care users. Social care users with learning disabilities reported being the most satisfied with their level of social contact compared with other client groups.
