

Health and Wellbeing Outcomes Report

Report of the Chief Officer for Communities, Public Health, Environment and Prosperity

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper introduces the updated outcomes report for the Devon Health and Wellbeing Board, which monitors the priorities identified in the Joint Health and Wellbeing Strategy for Devon 2016-2019.

2. Summary of the Health and Wellbeing Outcomes Report, December 2017

2.1 An 'updates only' version of the Health and Wellbeing Outcomes Report for March 2018 is included separately. The report is themed around the five Joint Health and Wellbeing Strategy 2016-19 priorities, and includes breakdowns by local authority, district, clinical commissioning group, inequalities characteristics and trends over time. 11 indicators have been updated with new data since the December 2017 report covering the following areas:

- **Children in Poverty, 2015** – 11.9% of children in Devon live in households dependent on benefits or tax credits. This figure has fallen from 2014, and Devon is statistically significantly lower than the South West, comparator group and national rates.
- **Early Years Foundation Score, 2017** – In 2017, 71.0% of children in Devon achieved a good level of development at school entry, compared to 70.5% for the South West, 71.1% for the local authority comparator group and 70.7% for England.
- **Teenage Conception Rate, Q2 2016** – Conceptions to under 18s have fallen in Devon and are broadly similar to South West and comparator group rates. Locally rates are highest in Teignbridge.
- **Alcohol-Related Admissions (narrow definition), 2016-17** – There were around 4,900 alcohol-related admissions to hospital for Devon residents in 2016/17. The age-standardised admissions rate (601.2 per 100,00) is below the comparator group rate and significantly below the South West and England rates.
- **Male Life Expectancy Gap, 2014-16** – Comparing life expectancy in the most and least deprived communities in Devon, the Slope Index of inequality reveals the gap in life expectancy for males is 5.8 years, significantly lower than South West and England.
- **Female Life Expectancy Gap, 2014-16** – for females, the gap is 4.0 years. This is significantly lower than the South West, local authority comparator group and England.
- **Healthy Life Expectancy Male, 2014-16** – Males in Devon can expect to live for 66.7 years in good health, compared with 63.3 years in England, 64.5 years in the South West, and 65.0 years in the local authority comparator group.
- **Healthy Life Expectancy Female, 2014-16** – Females in Devon can expect to live for 65.9 years in good health, compared with 63.9 years in England, 65.1 years in the South West, and 66.5 years in the local authority comparator group.
- **Injuries Due to Falls, 2016-17** – The age standardised rate per 100,000 for injuries due to falls in Devon was 1731.2. This is below the South West, local authority comparator group and England rates. Locally, rates in Mid Devon were significantly lower.
- **Rough sleeping rate per 1,000 households, 2017** – it is estimated that 78 people were sleeping rough in Devon, in Autumn 2017. Within Devon rates are highest in Exeter, based on an estimate of 35, and North Devon, based on a count of 20.
- **Self-Reported Wellbeing (low happiness score %), 2016/17** – 7.24% of the Devon population had a low happiness score on the index compared with 8.56% for the South West, 8.11% in the local authority comparator group and 8.54% in England overall.

2.2 Further details for these indicators are included in the separate report. The following tables in this paper provide a quick summary of overall findings:

- Table 1 provides a summary of the indicators, the latest available rate, an indication of trend and a quick comparison between Devon, the South West and England.
- Table 2 gives a short textual summary covering the five priority areas.
- Table 3 compares the indicators with Devon's local authority comparator group, a group of similar local authorities, and is ordered according to Devon's ranking. The darker purple shading shows the position of Devon in the local authority comparator (1 is best and 16 is worst) and the lighter purple shading shows Devon's ranking when the report was introduced in December 2016.

RAG Ratings

Red	R	Major cause for concern in Devon, benchmarking poor and/or trend sharply worsening
Amber	A	Possible cause for concern in Devon, benchmarking average and/or trend not improving
Green	G	No major cause for concern in Devon, benchmarking good and/or trend improving

Table 2: Priority Area Summaries, March 2018

Priority	Summary
1. Children, Young People & Families	Teenage conception rates are falling and levels of development at school entry are improving. Variations in excess weight, poverty, GCSE attainment and alcohol harm persist.
2. Living Well	Smoking rates and deaths from preventable causes are falling, and levels of excess weight, physical activity and fruit and vegetable consumption compare favourably with similar areas.
3. Good Health and Wellbeing in Older Age	Deaths at home, healthy life expectancy, falls and GP support compare well in Devon. However, whilst the service is effective, the coverage of re-ablement services is lower.
4. Strong and Supportive Communities	Housing-related measures, including fuel poverty, dwelling hazards and rough sleeping levels are a cause of concern in Devon.
5. Life Long Mental Health	Whilst general wellbeing is better, poorer outcomes are evident for those with mental health problems, including suicide rates, self-harm, and the mental wellbeing of local service users.

6. Public Health Impact

The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint

Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcomes indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.
